

CONTENTS

Introduction	VI
Chapter 1. The Starting Point: Homotopy Properties of Kähler Manifolds	1
1.1 Differential Graded Algebras and Minimal Models	1
1.2 <i>DGA</i> -Homotopy and Invariance of Minimal Models	8
1.3 Formality and Kähler Manifolds	18
1.4 Rational Homotopy of Fibrations	27
1.5 An Illustrative Geometric Example	33
1.6 Higher Order Massey Products	40
Chapter 2. Nilmanifolds	45
2.1 Nilmanifolds	45
2.2 The Benson-Gordon-Hasegawa Theorem	54
2.3 Symplectic Structures on Nilmanifolds and Related Miscellany	58
Chapter 3. Solvmanifolds	70
3.1 Solvmanifolds and their Mostow Bundles	71
3.2 Cohomology of Solvmanifolds: Hattori's Theorem	77
3.3 Rational Models of Solvmanifolds with Kähler Structures	87
3.4 The Benson-Gordon Conjecture	96
3.5 Higher Dimensional Examples and Twisted Tensor Products	100
Chapter 4. The Examples of McDuff	120
4.1 Classical Blow-Ups	120
4.2 The Symplectic Blow-Up	122
4.3 The Main Result	129
4.4 Remarks	134

Chapter 5. Symplectic Structures in Total Spaces of Bundles	137
5.1 Preliminaries on Homogeneous Spaces	137
5.2 Compact Homogeneous Symplectic Manifolds	141
5.3 The Weinstein Problem for Fiber Bundles	146
5.4 Koszul Complexes and Minimal Models of Homogeneous Spaces	151
5.5 Symplectic Fat Bundles and The Formalizing Tendency of Symplectic Structures	161
Chapter 6. Survey	173
6.1 Brylinski's Conjecture and 'Conjectural' Symplectic Invariants	173
6.2 Applications to The Original Arnol'd Conjecture	181
6.3 Dolbeault Homotopy Theory	189
6.4 Miscellaneous Examples	193
6.5 Discussion of Problems and Conjectures	198
References	200
Index	206
