Preface vii

1 Introduction 1

2 Preliminaries on Lie groups 5
2.1 Basic definitions . . . 5
2.2 Examples . . . 7
2.3 Dual representations . . . 9
2.4 The splitting lemma . . . 15
2.5 The composition law . . . 20
2.6 Matrix elements . . . 22
2.7 Stochastic processes on Lie groups . . . 24

3 Hopf algebras, quantum groups and braided spaces 45
3.1 Coalgebras, bialgebras, and Hopf algebras . . . 46
3.2 Examples of bialgebras and Hopf algebras . . . 50
3.3 Dual representations for quantum groups . . . 58
3.4 A composition law for quantum groups . . . 68
3.5 q-Exponentials . . . 73
3.6 Matrix elements . . . 78
3.7 Braided tensor categories . . . 81
3.8 Braided bialgebras and braided Hopf algebras . . . 83
3.9 Examples of braided bialgebras and braided Hopf algebras . . . 86
3.10 Braided spaces . . . 88
3.11 Compact quantum groups . . . 91

4 Stochastic processes on quantum groups 93
4.1 Quantum probability . . . 93
4.2 Independence . . . 94
4.3 Lévy processes on bialgebras . . . 96
4.4 Realisation of Lévy processes on Fock spaces . . . 98
4.5 Realisation of Lévy processes by an inductive limit . . . 102
4.6 Multiplicative stochastic integrals . . . 105
4.7 Feynman-Kac formula . . . 106
4.8 Time-reversal, duality, and R-matrices . . . 109

5 Markov structure of quantum Lévy processes **119**
5.1 Classical versions of quantum Lévy processes 120
5.2 Examples of classical versions of Lévy processes on $\mathbb{C}_q\langle a, a^*\rangle$ . . . 125
5.3 Examples of classical versions of Lévy processes on $U_q(sl(2))$ . . . 131
5.4 Lévy processes on $U_q(aff(1))$ 136

6 Diffusions on braided spaces **139**
6.1 A construction of (pseudo-) diffusions on braided spaces 140
6.2 Appell systems 146
6.3 Densities 150

7 Evolution equations and Lévy processes on quantum groups **153**
7.1 Appell systems 153
7.2 Wigner-type densities 156

8 Gauss laws in the sense of Bernstein on quantum groups **161**
8.1 Gaussian functionals in the sense of Bernstein 161
8.2 Uniqueness of embedding 171
8.3 Gaussian semi-groups in the sense of Bernstein 175

9 Phase retrieval for probability distributions on quantum groups and braided groups **183**
9.1 Classical simply connected nilpotent Lie groups 184
9.2 The phase problem on the braided line 185
9.3 The phase problem on nilpotent quantum or braided groups 185
9.4 On the braided plane 187
9.5 On the braided Heisenberg-Weyl group 187

10 Limit theorems on quantum groups **189**
10.1 Analogues of the law of large numbers and the central limit theorem 189
10.2 A mixed quantum-classical central limit theorem 191
10.3 Convergence to the Haar measure on compact quantum groups . . 198
10.4 q-central limit theorem for $U_q(su(2))$ 198
10.5 Domains of attraction for q-transformed random variables 206

Bibliography **215**

Index **225**
