Acknowledgments	xi
Introduction	3
Notation	6
Chapter 1. Galois Cohomology of p -adic Representations	9
1.1. p -adic Representations	9
1.2. Galois Cohomology	11
1.3. Local Cohomology Groups	12
1.4. Local Duality	18
1.5. Global Cohomology Groups	21
1.6. Examples of Selmer Groups	23
1.7. Global Duality	28
Chapter 2. Euler Systems: Definition and Main Results	33
2.1. Euler Systems	33
2.2. Results over K	36
2.3. Results over K_∞	40
2.4. Twisting by Characters of Finite Order	43
Chapter 3. Examples and Applications	47
3.1. Preliminaries	47
3.2. Cyclotomic Units	48
3.3. Elliptic Units	55
3.4. Stickelberger Elements	55
3.5. Elliptic Curves	63
3.6. Symmetric Square of an Elliptic Curve	73
Chapter 4. Derived Cohomology Classes	75
4.1. Setup	75
4.2. The Universal Euler System	78
4.3. Properties of the Universal Euler System	80
4.4. Kolyvagin's Derivative Construction	83

4.5. Local Properties of the Derivative Classes	90
4.6. Local Behavior at Primes Not Dividing \mathfrak{p}	92
4.7. Local Behavior at Primes Dividing \mathfrak{r}	98
4.8. The Congruence	102
Chapter 5. Bounding the Selmer Group	105
5.1. Preliminaries	105
5.2. Bounding the Order of the Selmer Group	106
5.3. Bounding the Exponent of the Selmer Group	114
Chapter 6. Twisting	119
6.1. Twisting Representations	119
6.2. Twisting Cohomology Groups	121
6.3. Twisting Euler Systems	122
6.4. Twisting Theorems	125
6.5. Examples and Applications	125
Chapter 7. Iwasawa Theory	129
7.1. Overview	129
7.2. Galois Groups and the Evaluation Map	135
7.3. Proof of Theorem 2.3.2	141
7.4. The Kernel and Cokernel of the Restriction Map	145
7.5. Galois Equivariance of the Evaluation Maps	147
7.6. Proof of Proposition 7.1.7	151
7.7. Proof of Proposition 7.1.9	154
Chapter 8. Euler Systems and p -adic L -functions	163
8.1. The Setting	164
8.2. Perrin-Riou's p -adic L -function and Related Conjectures	166
8.3. Connection with Euler Systems when $d_- = 1$	168
8.4. Example: Cyclotomic Units	171
8.5. Connection with Euler Systems when $d_- > 1$	173
Chapter 9. Variants	175
9.1. Rigidity	175
9.2. Finite Primes Splitting Completely in K_∞/K	178
9.3. Euler Systems of Finite Depth	179
9.4. Anticyclotomic Euler Systems	180
9.5. Additional Local Conditions	183
9.6. Varying the Euler Factors	185
Appendix A. Linear Algebra	189

A.1. Herbrand Quotients	189
A.2. p -adic Representations	191
Appendix B. Continuous Cohomology and Inverse Limits	195
B.1. Preliminaries	195
B.2. Continuous Cohomology	195
B.3. Inverse Limits	198
B.4. Induced Modules	201
B.5. Semilocal Galois Cohomology	202
Appendix C. Cohomology of p -adic Analytic Groups	205
C.1. Irreducible Actions of Compact Groups	205
C.2. Application to Galois Representations	207
Appendix D. p -adic Calculations in Cyclotomic Fields	211
D.1. Local Units in Cyclotomic Fields	211
D.2. Cyclotomic Units	216
Bibliography	219
Index of Symbols	223
Subject Index	227
