

# CONTENTS

Preface	vii
0. Introduction	1
1. Integrable functions and their primitives	8
2. Gauges and Borel measurability	21
3. Convergence	34
4. An abstract setting	48
5. An abstract setting with $D$ countable	55
6. Locally convex topologies tolerant to $Q$ -convergence	67
7. Topological vector spaces tolerant to $Q$ -convergence	75
8. $P$ as a complete topological vector space	86
9. Open problems	118
A. Appendix	123
List of symbols	128
Index	129
References	131
