Series Preface	vii
Preface	ix
Notation	xiii
Introduction	1
1 Spectral Analysis of Wave Motion	7
1.1 Continuous Fourier Transforms	8
1.2 Discrete Fourier Transform	11
1.3 Examples Using the FFT Algorithm	19
1.4 Experimental Aspects of Wave Signals	23
1.5 Spectral Analysis of Wave Motion	27
1.6 Propagating and Reconstructing Waves	35
Problems	41
2 Longitudinal Waves in Rods	43
2.1 Elementary Rod Theory	44
2.2 Basic Solution for Waves in Rods	47
2.3 Dissipation in Rods	50
2.4 Coupled Thermoelastic Waves	54
2.5 Reflections and Transmissions	60
2.6 Distributed Loading	68
Problems	72
3 Flexural Waves in Beams	74
3.1 Bernoulli-Euler Beam Theory	75
3.2 Basic Solution for Waves in Beams	78
3.3 Bernoulli-Euler Beam with Constraints	81
3.4 Reflection of Flexural Waves	84
3.5 Curved Beams and Rings	91
3.6 Coupled Beam Structure	99
Problems	104
4 Higher-Order Waveguides	105
4.1 Waves in Infinite Media	106
4.2 Semi-Infinite Media	111
4.3 Doubly Bounded Media	117
4.4 Doubly Bounded Media: Lamb Waves	121

4.5	Hamilton's Principle	126
4.6	Modified Beam Theories	131
4.7	Modified Rod Theories	139
	Problems	148
5	The Spectral Element Method	150
5.1	Structures as Connected Waveguides	151
5.2	Spectral Element for Rods	152
5.3	Spectral Element for Beams	158
5.4	General Frame Structures	163
5.5	Structural Applications	168
5.6	Waveguides with Varying Cross Section	173
5.7	Spectral Super-Elements	180
5.8	Impact Force Identification	190
	Problems	197
6	Waves in Thin Plates	198
6.1	Plate Theory	199
6.2	Point Impact of a Plate	206
6.3	Wavenumber Transform Solution	211
6.4	Waves Reflected from a Straight Edge	218
6.5	Scattering of Flexural Waves	224
6.6	Lateral Boundary Conditions	229
6.7	Curved Plates and Shells	233
	Problems	242
7	Structure-Fluid Interaction	243
7.1	Acoustic Wave Motion	244
7.2	Plate-Fluid Interaction	247
7.3	Double Panel Systems	253
7.4	Waveguide Modeling	257
7.5	Radiation from Finite Plates	263
7.6	Cylindrical Cavity	269
	Problems	274
8	Thin-Walled Structures	275
8.1	Membrane Spectral Elements	276
8.2	Spectral Elements for Flexure	282
8.3	Folded Plate Structures	286
8.4	Structural Applications	290
8.5	Segmented Cylindrical Shells	295
8.6	Future of Spectral Elements	302
	Problems	305
	Afterword	307
	Appendix: Bessel Functions	309
	References	313
	Index	319
