

Contents

Preface	iii
Anomalous diffusion and stability of Harnack inequalities <i>Martin T. Barlow</i>	1
From isoperimetric inequalities to heat kernels via symmetrisation <i>G�erard Besson</i>	27
Discrete Isoperimetric Inequalities <i>Fan Chung</i>	53
An excursion into geometric analysis <i>Tobias H. Colding and William P. Minicozzi II</i>	83
Eigenvalues of elliptic operators and geometric applications <i>Alexander Grigor'yan, Yuri Netrusov, and Shing-Tung Yau</i>	147
Spectral gap, logarithmic Sobolev constant, and geometric bounds <i>Michel Ledoux</i>	219
Discrete Analytic Functions: An Exposition <i>L�aszl� Lov�asz</i>	241
Conformal properties in classical minimal surface theory <i>William H. Meeks III and Joaqu�n P�erez</i>	275
Analysis of the Cut Locus via the Heat Kernel <i>Robert Neel and Daniel Stroock</i>	337
Analysis on Riemannian co-compact covers <i>Laurent Saloff-Coste</i>	351
Functoriality and Small Eigenvalues of Laplacian on Riemann Surfaces <i>Freydoon Shahidi</i>	385
The inverse spectral problem <i>Steve Zelditch</i>	401
