Chapter 1	
Introduction	1
1. Two constructions	1
1.1. The resultative construction	2
1.2. The <i>at</i> -construction	6
1.3. The notion of change	7
2. Cognitive Grammar	10
2.1. Basic assumptions	11
2.2. Predication	15
2.3. Composite structures	22
3. Preview	24
Chapter 2	
Resultative constructions and change constructions	27
1. Resultative phrases and constructions	27
1.1. Transitive resultative constructions	28
1.2. Intransitive resultative constructions	33
1.2.1. Verbs of manner of motion	34
1.2.2. Verbs of change of state	38
1.3. Conceptual distance	40
1.4. Paraphrases for the resultative construction	42
1.5. Summary	43
2. The billiard-ball model	44
2.1. The syntactic realisation of the resultative phrase	44
2.2. States and positions	45

2.3.	Reverse causal ordering	47
2.4.	Causality and manipulable entities	49
2.5.	A first schematic representation	52
2.6.	Summary	59
3.	The change phrase	60
3.1.	A host of constructions	60
3.2.	Sublexical change	63
3.2.1.	Emission verbs	63
3.2.2.	Orientation and sound emission verbs	68
3.3.	LIKE change constructions	70
3.4.	Prepositional phrases and phrasal verbs	72
3.5.	Summary	76
4.	Conclusion	76

Chapter 3

Asymmetric resultatives and the change complex 79

1.	Transitivity	80
1.1.	A preliminary analysis based on Levin and Rappaport Hovav (1995)	80
1.2.	The Direct Object Restriction	82
1.3.	Some problematic data	86
1.4.	Summary	91
2.	The change complex	91
2.1.	Allative and ablative prepositions	92
2.1.1.	Ablative cases	93
2.1.2.	Allative cases	96
2.2.	Prepositions in the change complex	100
2.3.	The problematic examples	105
2.4.	Summary	107
3.	Impossible combinations	107
3.1.	An aesthetic paradox	107
3.2.	Affectedness and objectivity: When properties are not in the eye of the beholder	109
3.3.	Goldberg's (1995) Unique Path Constraint	115
4.	Conclusion	117

Chapter 4		
Motion and idiosyncrasy		119
1.	The motion scenario	120
1.1.	The motion scenario is evoked by the construction	121
1.2.	The motion scenario is evoked by the verb	124
1.3.	Summary	129
2.	Tight links and information retrieval	130
2.1.	Transitivity and motion	130
2.2.	Linking events	135
3.	Lexical variation	137
3.1.	Wechsler's (2001) approach	140
3.1.1.	Type I: Shared arguments and gradable adjectives	143
3.1.2.	Type II and type III: Shared arguments, non-gradable adjectives and prepositional phrases	147
3.1.3.	Non-shared arguments	149
3.1.3.1.	Temporality	149
3.1.3.2.	Competition	152
3.2.	Gestalt versus part-whole properties	155
3.3.	Summary	159
4.	Interim conclusion	161
4.1.	Transitivity	162
4.2.	Resultative adjectives	165
4.2.1.	Temporality	165
4.2.2.	Adjective selection	166
Chapter 5		
The Force Change Schema and the Event Change Schema		173
1.	The Force Change Schema	174
1.1.	Subcategorised objects	175
1.2.	Unsubcategorised objects: Above-the-norm reading and tight links	178
1.2.1.	Asymmetric change constructions	181
1.2.2.	Blending and the Force Change Schema	186
1.2.3.	Non-asymmetric change constructions	193

1.3.	Mild causality and specification	201
1.3.1.	Mild causality	201
1.3.2.	Specification	207
1.4.	Goldberg's (1995) analysis	211
2.	The Event Change Schema	218
2.1.	Temporal coextensiveness	219
2.2.	Temporal sequencing	227
2.3.	The transitive Event Change Schema and subject orientation	229
2.3.1.	Non-unidirectional energy flows in the Event Change Schema	230
2.3.2.	<i>I love you to distraction</i> : Subject orientation with an asymmetric energy flow	234
3.	Conclusion	238

Chapter 6

The Event Force Change Schema and verb classes	241	
1.	The Event Force Change Schema	242
1.1.	The causal variant	242
1.2.	The noncausal variant	247
2.	The lack of object orientation	252
2.1.	On satisfaction and love	253
2.2.	<i>to the point of</i>	260
2.3.	Part-whole variants	264
2.3.1.	Subject orientation	264
2.3.2.	Understood manipulee orientation	267
2.3.3.	Objects as paths	269
3.	On indeterminacy and complexity	271
4.	Verb classes	274
4.1.	Middle verbs	278
4.2.	Verbs of manner of motion	279
4.3.	Verbs of accompaniment	281
4.4.	Emission verbs	284
4.5.	Verbs of transformation and creation	289
5.	Conclusion	292

Chapter 7	
<i>at</i>-constructions	297
1. The conative alternation	298
1.1. Levin's (1993) definition and list	298
1.2. Van der Leek's (1996) analysis	303
2. The allative and ablative scenarios	309
2.1. The Allative Schema: Translational motion with possible contact	309
2.2. The Ablative Schema: Necessary contact without translational motion	314
2.3. The Allative/Ablative Schema: Translational motion with necessary contact	319
3. Pesetsky's (1995) paradox	323
4. Conclusion	326
Chapter 8	
Conclusion	329
1. Overview	329
2. Summary	330
Notes	351
References	379
Sources of examples	389
Index	391
