

# Contents

Preface	v
<b>Part I. Elliptic Curves</b>	<b>1</b>
An Overview D. S. NAGARAJ	3
A Quick Introduction to Algebraic Geometry and Elliptic Curves D.S. NAGARAJ AND B. SURY	5
Elliptic Curves over Finite Fields B. SURY	33
The Nagell-Lutz Theorem RAJAT TANDON	49
Weak Mordell-Weil Theorem C. S. RAJAN	63
The Mordell-Weil Theorem D.S. NAGARAJ AND B. SURY	73
Complex Multiplication EKNATH GHATE	85
The Main Theorem of Complex Multiplication DIPENDRA PRASAD	109
Approximations of Algebraic Numbers by Rationals: A Theorem of Thue T. N. SHOREY	119

Siegel's Theorem: Finiteness of Integral Points S. D. ADHIKARI AND D. S. RAMANA	139
$p$ -adic Theta Functions and Tate Curves ALEXANDER F. BROWN	151
$\ell$ -adic Representation Attached to an Elliptic Curve over a Number Field D. S. NAGARAJ	167
Arithmetic on Curves CHANDAN SINGH DALAWAT	193
<b>Part II. Modular Forms</b>	<b>201</b>
Introduction B. RAMAKRISHNAN	203
Elliptic Functions PARVATI SHASTRI	205
An Introduction to Modular Forms and Hecke Operators M. MANICKAM AND B. RAMAKRISHNAN	223
$L$ -Functions of Modular Forms C. S. YOGANANDA	247
On the Eichler-Shimura Congruence Relation T. N. VENKATARAMANA	255
<b>Part III. Cryptography</b>	<b>267</b>
Cryptography ASHWANI K. BHANDARI	269
Classical Cryptosystems R. THANGADURAI	275
The Public Key Cryptography ASHWANI K. BHANDARI	287
Primality and Factoring AMORA NONGKYNRIH	303
Elliptic Curves and Cryptography R. BALASUBRAMANIAN	325
