

Chapter 1 INTRODUCTION

1

1.1 Themes of Analysis

2

1.2 Information Lessons

4

Part I: ENTROPY: The Foundation of Information

Chapter 2 INFORMATION DEFINITION

9

2.1 A Measure of Information

10

2.2 The Definition of Entropy

12

2.3 Information Sources

14

2.4 Source Combinations

15

2.5 Bits as a Measure

16

2.6 About Claude E. Shannon

17

2.7 Exercises

18

2.8 Bibliography

19

Chapter 3 CODES

21

3.1 The Coding Problem

21

3.2 Average Code Length and Entropy

27

3.3 Shannon's First Theorem

30

3.4 Exercises

33

3.5 Bibliography

34

Chapter 4 COMPRESSION

35

4.1 Huffman Coding

35

4.2 Intersymbol Dependency

40

4.3 Lempel–Ziv Coding

44

4.4 Other Forms of Compression

48

4.5 Exercises

52

4.6 Bibliography

53

Chapter 5 CHANNELS

55

5.1 Discrete Channel

56

5.2 Conditional and Joint Entropies

57

5.3	Flipping a Channel	60
5.4	Mutual Information	62
5.5	Capacity*	65
5.6	Shannon's Second Theorem*	66
5.7	Exercises	68
5.8	Bibliography	69

Chapter 6 ERROR-CORRECTING CODES 70

6.1	Simple Code Concepts	71
6.2	Hamming Distance	73
6.3	Hamming Codes	75
6.4	Linear Codes	77
6.5	Low-Density Parity Check Codes	78
6.6	Interleaving	79
6.7	Convolutional Codes	80
6.8	Turbo Codes	82
6.9	Applications	83
6.10	Exercises	85
6.11	Bibliography	86

Summary of Part I 89

Part II: ECONOMICS: Strategies for Value

Chapter 7 MARKETS 93

7.1	Demand	94
7.2	Producers	97
7.3	Social Surplus	99
7.4	Competition	100
7.5	Optimality of Marginal Cost Pricing	101
7.6	Linear Demand Curves	102
7.7	Copyright and Monopoly	103
7.8	Other Pricing Methods	107
7.9	Oligopoly	108
7.10	Exercises	111
7.11	Bibliography	113

Chapter 8 PRICING SCHEMES 114

8.1	Discrimination	114
8.2	Versions	116
8.3	Bundling	119
8.4	Sharing	124
8.5	Exercises	127
8.6	Bibliography	128

Chapter 9	VALUE	130
9.1	Conditional Information	131
9.2	Informativity and Generalized Entropy*	133
9.3	Decisions	135
9.4	The Structure of Value	135
9.5	Utility Functions*	139
9.6	Informativity and Decision Making*	140
9.7	Exercises	141
9.8	Bibliography	142

Chapter 10	INTERACTION	143
10.1	Common Knowledge	144
10.2	Agree to Disagree?	146
10.3	Information and Decisions	149
10.4	A Formal Analysis*	150
10.5	Metcalfé's Law	153
10.6	Network Economics*	155
10.7	Exercises	159
10.8	Bibliography	160

Summary of Part II		161
---------------------------	--	-----

Part III: ENCRYPTION: Security through Mathematics

Chapter 11	CIPHERS	165
11.1	Definitions	166
11.2	Example Ciphers	166
11.3	Frequency Analysis	169
11.4	Cryptograms	169
11.5	The Vigenère Cipher	171
11.6	The Playfair Cipher	174
11.7	Homophonic Codes	175
11.8	Jefferson's Wheel Cipher	176
11.9	The Enigma Machine	177
11.10	The One-Time Pad	181
11.11	Exercises	183
11.12	Bibliography	184

Chapter 12	CRYPTOGRAPHY THEORY	186
12.1	Perfect Security	186
12.2	Entropy Relations	188
12.3	Use of a One-Time Pad*	193
12.4	The DES and AES Systems	196

12.5 Exercises	197
12.6 Bibliography	198

Chapter 13 PUBLIC KEY CRYPTOGRAPHY	200
13.1 A Basic Dilemma	200
13.2 One-Way Functions	201
13.3 Discrete Logarithms	202
13.4 Diffie–Hellman Key Exchange	203
13.5 Modular Mathematics	205
13.6 Alternative Puzzle Solution	208
13.7 RSA	209
13.8 Square and Multiply*	211
13.9 Finding Primes*	213
13.10 Performance*	214
13.11 The Future	215
Appendix: The Extended Euclidean Algorithm	216
13.12 Exercises	217
13.13 Bibliography	218

Chapter 14 SECURITY PROTOCOLS	220
14.1 Digital Signatures	220
14.2 Blinded Signatures	223
14.3 Digital Cash	225
14.4 Identification	226
14.5 Zero-Knowledge Proofs	228
14.6 Smart Cards	231
14.7 Exercises	234
14.8 Bibliography	235

Summary of Part III	237
----------------------------	-----

Part IV: EXTRACTION: Information from Data

Chapter 15 DATA STRUCTURES	241
15.1 Lists	241
15.2 Trees	244
15.3 Traversal of Trees	247
15.4 Binary Search Trees (BST)	248
15.5 Partially Ordered Trees	252
15.6 Tries*	254
15.7 Basic Sorting Algorithms	255
15.8 Quicksort	257
15.9 Heapsort	260
15.10 Merges	261
15.11 Exercises	262
15.12 Bibliography	263

Chapter 16 DATABASE SYSTEMS	264
16.1 Relational Structure	264
16.2 Keys	267
16.3 Operations	267
16.4 Functional Dependencies	271
16.5 Normalization	271
16.6 Joins and Products*	277
16.7 Database Languages	279
16.8 Exercises	281
16.9 Bibliography	282

Chapter 17 INFORMATION RETRIEVAL	284
17.1 Inverted Files	285
17.2 Strategies for Indexing	287
17.3 Inverted File Compression*	291
17.4 Queries	293
17.5 Ranking Methods	294
17.6 Network Rankings	296
17.7 Exercises	299
17.8 Bibliography	299

Chapter 18 DATA MINING	301
18.1 Overview of Techniques	301
18.2 Market Basket Analysis	303
18.3 Least-Squares Approximation	306
18.4 Classification Trees	310
18.5 Bayesian Methods	314
18.6 Support Vector Machines	319
18.7 Other Methods	323
18.8 Exercises	325
18.9 Bibliography	327

Summary of Part IV	327
---------------------------	-----

Part V: EMISSION: The Mastery of Frequency

Chapter 19 FREQUENCY CONCEPTS	331
19.1 The Telegraph	334
19.2 When Dots Became Dashes	335
19.3 Fourier Series	338
19.4 The Fourier Transform	339
19.5 Thomas Edison and the Telegraph	342
19.6 Bell and the Telephone	342
19.7 Lessons in Frequency	345
19.8 Exercises	347
19.9 Bibliography	349

Chapter 20	RADIO WAVES	350
20.1	Why Frequencies?	350
20.2	Resonance	354
20.3	The Birth of Radio	354
20.4	Marconi's Radio	355
20.5	The Spark Bandwidth	357
20.6	The Problems	359
20.7	Continuous Wave Generation	360
20.8	The Triode Vacuum Tube	361
20.9	Modulation Mathematics	363
20.10	Heterodyne Principle	365
20.11	Frequency Modulation	367
20.12	Exercises	369
20.13	Bibliography	372
Chapter 21	SAMPLING AND CAPACITY	373
21.1	Entropy	373
21.2	Capacity of the Gaussian Channel	376
21.3	Sampling Theorem	378
21.4	Generalized Sampling Theorem*	380
21.5	Thermal Noise	383
21.6	Capacity of a Band-Limited Channel	384
21.7	Spread Spectrum	385
21.8	Spreading Technique	387
21.9	Multiple Access Systems	388
21.10	Exercises	391
21.11	Bibliography	392
Chapter 22	NETWORKS	393
22.1	Poisson Processes	394
22.2	Frames	395
22.3	The ALOHA System	396
22.4	Carrier Sensing	398
22.5	Routing Algorithms	399
22.6	The Bellman–Ford Algorithm	400
22.7	Distance Vector Routing	401
22.8	Dijkstra's Algorithm	402
22.9	Other Issues	404
22.10	Exercises	405
22.11	Bibliography	406
Summary of Part V		407
Index		409
