List of Figures	xi
List of Tables	xv
Preface	xvii
Acknowledgement	xix
1 Introduction to Ad-hoc Networks	1
1.1 Outlining ad-hoc networks	1
1.2 Advantages and application areas	3
1.3 Radio technologies	4
1.4 Mobility support	5
2 Scope of the book	9
3 Modeling Ad-hoc Networks	15
3.1 Erdős and Rényi random graph model	18
3.2 Regular lattice graph model	21
3.3 Scale-free graph model	25
3.4 Geometric random graph model	25
3.4.1 Radio propagation essentials	26
3.4.2 Pathloss geometric random graph model	30
3.4.3 Lognormal geometric random graph model	31
3.5 Measurements	35
3.6 Chapter summary	38
4 Degree in Ad-hoc Networks	41
4.1 Link density and expected node degree	41
4.2 Degree distribution	44
4.3 Chapter summary	49

5	Hopcount in Ad-hoc Networks	51
5.1	Global view on parameters affecting the hopcount	51
5.2	Analysis of the hopcount in ad-hoc networks	52
5.3	Chapter summary	56
6	Connectivity in Ad-hoc Networks	57
6.1	Connectivity in $G_p(N)$ and $G_{p(r_{ij})}(N)$ with pathloss model ...	58
6.2	Connectivity in $G_{p(r_{ij})}(N)$ with lognormal model	60
6.3	Giant component size	66
6.4	Chapter summary	68
7	MAC Protocols for Packet Radio Networks	71
7.1	The purpose of MAC protocols	71
7.2	Hidden terminal and exposed terminal problems	72
7.3	Classification of MAC protocols	74
7.4	Chapter summary	75
8	Interference in Ad-hoc Networks	77
8.1	Effect of MAC protocols on interfering node density	78
8.2	Interference power estimation	82
8.2.1	Sum of lognormal variables	83
8.2.2	Position of interfering nodes	87
8.2.3	Weighting of interference mean powers	89
8.2.4	Interference calculation results	91
8.3	Chapter summary	93
9	Simplified Interference Estimation: Honey-Grid Model	95
9.1	Model description	95
9.2	Interference calculation with honey-grid model	100
9.3	Comparing with previous results	103
9.4	Chapter summary	105
10	Capacity of Ad-hoc Networks	107
10.1	Routing assumptions	107
10.2	Traffic model	108
10.3	Capacity of ad-hoc networks in general	109
10.4	Capacity calculation based on honey-grid model	111
10.4.1	Hopcount in honey-grid model	111
10.4.2	Expected carrier to interference ratio	114
10.4.3	Capacity and throughput	117
10.5	Chapter summary	122
11	Book Summary	125
A	Ant-routing	131

B Symbols and Acronyms	135
References	139
