Introduction: Product strategy and management	xi
Introduction	xi
Perspective	xii
Structure	xii
Acknowledgements	xvii
Part I The theoretical foundations	1
1 Competition and product strategy	3
Introduction	4
What links competitiveness, marketing and product strategy?	5
Marketing and competitive success	7
Environmental change	12
Life cycle analysis	14
Managing competition: product strategy is central	19
Product strategy and management	27
The process of innovation	33
Summary	38
Questions	39
2 The product in theory and practice	40
Introduction	41
What is a product?	41
Objective versus subjective selection criteria	51
Are services different?	55
Branding	58
Classifying new products	62
The Buygrid Analytic Framework	65
New service development	66
Summary	70
Questions	71
3 Buyer behaviour	72
Introduction	73
Models of buyer behaviour	74
Influences on the decision process	76

A composite model of buying behaviour	81
The adoption and diffusion of new products	89
Researching the market for major innovations	98
Summary	101
Questions	101
4 The product life cycle in theory and practice	103
Introduction	104
The product life cycle	105
The seven stages of the product life cycle	108
Managerial applications of the PLC concept	114
Criticisms of the PLC	118
Operationalizing the PLC	123
Summary	134
Questions	135
5 Product portfolios	136
Introduction	137
The concept of the product portfolio	137
The BCG growth–share matrix	142
Shell’s directional policy matrix	148
Summary	153
Questions	153
Part II New product development	155
6 The importance, nature and management of the new product development process	157
Introduction	158
New product development models	158
Overview of the stages of the new product development process	160
The usefulness of the process models	165
Factors affecting success and failure of new product development	170
Implications of the success and failure literature for the process: focusing on the process and the people	183
Summary	196
Questions	196
7 New product strategy	197
Introduction	198
The need for product innovation strategy	198
The components of new product strategy: technologies and markets	204
Summary	215
Questions	216

8	Idea management for new product development	217
	Introduction	218
	The objective of idea generation	219
	Sources of information for new product ideas	222
	Techniques for activating sources of information	231
	Managing creativity	249
	Summary	253
	Questions	254
9	Screening new product ideas	255
	Introduction	256
	What is screening?	256
	The importance of screening	258
	Types of screens	265
	Screening: process and criteria	269
	Summary	272
	Questions	273
10	Concept development and testing	274
	Introduction	275
	The purposes of concept testing	277
	What is a new product concept?	282
	The process of concept testing	284
	Research methods for concept testing	294
	Specific techniques for concept development and testing	300
	Summary	306
	Questions	307
11	Business analysis	308
	Introduction	309
	What goes into a business analysis?	310
	Basic financial concepts	311
	Financial techniques for new product development	316
	Summary	327
	Questions	328
12	Product testing	329
	Introduction	330
	The purpose of product testing	332
	The overriding concerns of product testing	333
	Major decisions in constructing a product test	335
	Product testing in industrial markets	351
	Summary	354
	Questions	354

Part III	Product management	355
13	Commercialization: test marketing and launching the new product	357
	Introduction	358
	Test marketing	358
	Time to market	368
	Breaking into the market	373
	Reprise	388
	Case study: TI Superform – superplastic aluminium	389
	Summary	395
	Questions	395
14	Managing growth	397
	Introduction	398
	Resistance to change	398
	Leveraging new product growth	402
	Computerized tomography: the EMI scanner	404
	Sustaining differentiation	411
	Summary	415
	Questions	415
15	Managing the mature product	416
	Introduction	417
	Maturity – its nature and causes	417
	Offensive strategies	420
	Extending the product life cycle	426
	Managing the relationship	427
	Customer relationship management	431
	Summary	434
	Questions	435
Part IV	Product elimination	437
16	Controlling the product line: an overview of the deletion decision	439
	Introduction	440
	The importance of product deletion	441
	The reasons for the neglect of product deletion	443
	The scope of the deletion decision	446
	Triggers in product deletion	448
	Summary	454
	Questions	455

17	Reaching the decision to delete a product	456
	Introduction	457
	Identification of deletion candidates	457
	The diagnostic routine: analysis and revitalization	462
	Evaluation of deletion candidates: deciding to drop the product	469
	Summary	474
	Questions	475
18	Implementing the deletion decision	476
	Introduction	477
	How deletion decisions are implemented	477
	Summary	487
	Questions	487
19	Reprise	488
	Introduction	488
	Structure	489
	Part I – The theoretical foundations	490
	Part II – New product development	495
	Part III – Product management	499
	Part IV – Product elimination	501
	Bibliography	504
	Index	527
