Introduction 1

Harold Pashler

- Contemporary attention theory 2
- Current research: The scope of this volume 6
- References 9

1 Visual search 13

Jeremy M. Wolfe

- Section I: The basic paradigm 15
- Section II: Preattentive processing of visual stimuli 22
- Section III: Using preattentive information 43
- Conclusion 55
- Acknowledgements 56
- References 56

2 Auditory attention: The psychoacoustical approach 75

Bertram Scharf

- Introduction 75
- Brief history and update 78
- Psychoacoustics of attention: Stimulus attributes 84
- Selective attention for speech and other complex patterns 108
- Neurological bases of auditory selective attention 110
- Summary and conclusions 112

Acknowledgements	113
References	113

3 Visual attention and eye movements 119

James E. Hoffman

Attention and saccadic eye movements	120
Attention and pursuit eye movements	147
Attention and vergence eye movements	148
Conclusions	149
Acknowledgements	149
References	150

4 Attentional limitations in dual-task performance 155

Harold Pashler and James C. Johnston

Introduction	155
Empirical evidence on limitations	158
PRP and other aspects of attention	173
Exceptions to the PRP effect?	177
Where is the bottleneck anatomically?	178
Attentional limits in memory	181
Concluding comments	184
References	185

5 Attention and inhibition 191

Bruce Milliken and Steven P. Tipper

Three landmarks	192
Attention as expectation	196
Attention to a primary task	198
Attention as selection: Item-specific effects	204
Conclusion	215
Acknowledgements	217
References	217

6 Control of visual attention 223

Steven Yantis

Goal-driven visual selection	225
Stimulus-driven control of attention	238
Interaction of goal-driven and stimulus-driven attention	251
Acknowledgement	253
References	253

7 Neurophysiology of selective attention 257

Steven J. Luck

Introduction	257
The locus of selection	265
Neurophysiological studies of cuing and search	278

Conclusions	290
References	291

8 The neuropsychology of spatial attention 297

Jon Driver

Extinction	299
Unilateral neglect	304
Balint's syndrome	310
Grouping effects on spatial selectivity	312
Measuring the extent of unattended and neglected processing	320
Feature integration in extinction, neglect, and Balint's syndrome	328
Conclusions	333
References	335

9 Computational modeling of spatial attention 341

Michael C. Mozer and Mark Sitton

Introduction	341
What is a computational model?	342
A basic model of object recognition	346
A model of attentional selection	351
Simulations of spatial selection	355
Attention as a spotlight?	364
Modeling various selection criteria	369
The relationship of object-based and location-based attention	371
Simulations of visual search	374
The role of selective attention	382
Contrasting theoretical perspectives on selective attention	383
Issues in computational modeling	384
Acknowledgements	388
References	388
