Maps

1. Durham Priory appropriated parishes and manorial demesnes between the Tyne and Tees 18
2. Geographical divisions, rivers, and parishes appropriated to Durham Priory between the Tyne and Tees 32
3. Settlements, markets and fairs in the middle ages between the Tyne and Tees 40

Tables

1. 'Receipts from churches': calculations made by the Durham monks	16
2. Appropriated parishes and office holders at Durham Priory, c. 1300–1536	20
3. Fifteenth-century harvest composition in selected townships from three geographical zones in the Tyne Tees region	34
4. Towns between the Tyne and Tees, c. 1040–1350	48
5. Estimating the quantity of grain produced between the Tyne and Tees in 1293	52
6. Tithe grain and demesne output, 1315–29	55
7. Skipton and Kildwick tithe output in the 1310s	58
8. Total tithe output from four townships, 1304–43	65
9. Billingham township tithe output before and after the Black Death	72
10. Aycliffe tithe output	84
11. Shadforth tithe output	84
12. Aycliffe township grain tithe output, 1423–38	99
13. Decennial average wheat prices in north-east and southern England, 1400–1519	102
14. Stock kept at Wingate, Finchale and Cocken, 1446–50	107
15. Grain tithe output from Billingham township, 1510–36	114
16. Grain tithe output from Cowpen Bewley township in Billingham parish, 1510–36	114
17. Grain imported to Newcastle, Michaelmas 1508 to Michaelmas 1509, as recorded in the city chamberlains' accounts	118
18. A speculative analysis of the importance of imported grain in proportion to locally produced grain, 1508–9	118
19. Deflated cash receipts for sold grain tithes in Durham and Normandy, 1399–1527	125
20. Fifteenth-century grain tithe receipt levels in Durham and southern France	126
21. Relationship between grain price and the ratio of tithe to demesne output in Westoe, 1323–43	145
22. Wheat output in Billingham township and Ketton demesne, 1397–1406	153
23. Tithe and demesne wheat output, 1401–2	154
24. Numbers buying tithes and holding land from the Durham Priory bursars, 1340–1496	164
25. Tenant farmer budget modelled using data from Elvethall, 1491–2	167

Figures

1. Indexed cash receipts from tithes in the Tyne Tees region sold by Durham Priory, 1270–1536	26
2. Estimated grain output indices based on Durham Priory cash tithe receipts from the Tyne Tees region, 1270–1536	28
3. Export of wool from Newcastle, Hartlepool and London, 1280–1343	50
4. Estimated grain output and grain price indices, 1349–1365	78
5. Indexed receipts from tithes sold for cash in areas of differing land fertility, 1350–1430	82
6. Hostiller's receipts from coal tithes, 1350–1430	86
7. Tithe receipts from South Shields fishermen, 1345–1424	90
8. Total grain tithe output (unweighted) from Billingham township, 1388–1536	104
9. Wool exports from Newcastle and England (triennial averages), 1400–1547	106
10. Estimated cereal production around Seville (Castile), 1400–1503	122
11. Tithe income (expressed in grain) in Durham and south-western Brabant, 1403–1536	128
12. Tithe income (expressed as grain) in Durham and South Limburg, 1440–1519	129
13. Billingham wheat output and prices, 1388–1519	136
14. Newton Bewley, Bewley manor and Wolviston wheat output and prices, 1469–1519	138
15. Cowpen Bewley barley output and prices, 1396–1536	140
16. Cowpen Bewley output and price ratios for wheat and barley, 1396–1519	141
17. Cowpen Bewley oats and legumes output and mean grain price scatter graph, 1485–1536	142
18. Billingham tithe to demesne barley output ratios and prices, 1299–1343	146
19. Speculative analysis of the effect of changing tithe buyers' profits, collection and processing costs and interest payments on deflated cash tithe receipt indices, 1270–1536	178
20. Speculative analysis of the impact of changing harvest composition on the deflation of cash tithe receipt indices, 1270–1536	180
