# Contents

Preface vii

Chapter 1. On Strichartz's Inequalities and the Nonlinear Schrödinger Equation on Irrational Tori 1
*J. Bourgain*

Chapter 2. Diffusion Bound for a Nonlinear Schrödinger Equation 21
*J. Bourgain and W.-M. Wang*

Chapter 3. Instability of Finite Difference Schemes for Hyperbolic Conservation Laws 43
*A. Bressan, P. Baiti, and H. K. Jenssen*

Chapter 4. Nonlinear Elliptic Equations with Measures Revisited 55
*H. Brezis, M. Marcus, and A. C. Ponce*

Chapter 5. Global Solutions for the Nonlinear Schrödinger Equation on Three-Dimensional Compact Manifolds 111
*N. Burq, P. Gérard, and N. Tzvetkov*

Chapter 6. Power Series Solution of a Nonlinear Schrödinger Equation 131
*M. Christ*

Chapter 7. Eulerian-Lagrangian Formalism and Vortex Reconnection 157
*P. Constantin*

Chapter 8. Long Time Existence for Small Data Semilinear Klein-Gordon Equations on Spheres 171
*J.-M. Delort and J. Szeftel*

Chapter 9. Local and Global Wellposedness of Periodic KP-I Equations 181
*A. D. Ionescu and C. E. Kenig*

Chapter 10. The Cauchy Problem for the Navier-Stokes Equations with Spatially Almost Periodic Initial Data 213
*Y. Giga, A. Mahalov, and B. Nicolaenko*

Chapter 11. Longtime Decay Estimates for the Schrödinger Equation on Manifolds 223
*I. Rodnianski and T. Tao*

Chapter 12. Dispersive Estimates for Schrödinger Operators: A Survey 255
*W. Schlag*
