

Contents

I. INTRODUCTION

1. A Brief Overview of Social Neuroscience 3
Eddie Harmon-Jones and Piotr Winkielman

II. EMOTION PROCESSES

2. The Importance of Emotion–Social Cognition Interactions for Social Functioning: Insights from Orbitofrontal Cortex 15
Jennifer S. Beer
3. Neurobiology of Emotion Recognition: Current Evidence for Shared Substrates 31
Andrea S. Heberlein and Ralph Adolphs
4. Ten Years of Research with the Trier Social Stress Test—Revisited 56
Brigitte M. Kudielka, Dirk H. Hellhammer, and Clemens Kirschbaum
5. I Know How You Feel: Social and Emotional Information Processing in the Brain 84
Catherine J. Norris and John T. Cacioppo
6. How Thinking Controls Feeling: A Social Cognitive Neuroscience Approach 106
Kevin N. Ochsner

III. MOTIVATION PROCESSES

- | | | |
|-----|---|-----|
| 7. | Asymmetrical Frontal Cortical Activity, Affective Valence,
and Motivational Direction
<i>Eddie Harmon-Jones</i> | 137 |
| 8. | Reward: Neural Circuitry for Social Valuation
<i>Brian Knutson and G. Elliott Wimmer</i> | 157 |
| 9. | A Biobehavioral Model of Implicit Power Motivation Arousal,
Reward, and Frustration
<i>Oliver C. Schultheiss</i> | 176 |
| 10. | Vigilant and Avoidant Responses to Angry Facial Expressions:
Dominance and Submission Motives
<i>Jack van Honk and Dennis J. L. G. Schutter</i> | 197 |

IV. ATTITUDES AND SOCIAL COGNITION

- | | | |
|-----|--|-----|
| 11. | Attitudes and Evaluation: Toward a Component Process Framework
<i>William A. Cunningham and Marcia K. Johnson</i> | 227 |
| 12. | A Social Cognitive Neuroscience Model of Human Empathy
<i>Jean Decety</i> | 246 |
| 13. | How Dynamics of Thinking Create Affective and Cognitive Feelings:
Psychology and Neuroscience of the Connection
between Fluency, Liking, and Memory
<i>Tedra Fazendeiro, Troy Chenier, and Piotr Winkielman</i> | 271 |
| 14. | The X- and C-Systems: The Neural Basis of Automatic
and Controlled Social Cognition
<i>Matthew D. Lieberman</i> | 290 |
| 15. | An Evolutionary Perspective on Domain Specificity
in Social Intelligence
<i>Valerie E. Stone</i> | 316 |

V. PERSON PERCEPTION, STEREOTYPING, AND PREJUDICE

- | | | |
|-----|--|-----|
| 16. | Mechanisms for the Regulation of Intergroup Responses:
Insights from a Social Neuroscience Approach
<i>David M. Amodio, Patricia G. Devine, and Eddie Harmon-Jones</i> | 353 |
| 17. | Social Cognitive Neuroscience of Person Perception:
A Selective Review Focused on the Event-Related Brain Potential
<i>Bruce D. Bartholow and Cheryl L. Dickter</i> | 376 |

- 18. Social Neuroscience and Social Perception:** 401
 New Perspectives on Categorization, Prejudice, and Stereotyping
Tiffany A. Ito, Eve Willadsen-Jensen, and Joshua Correll

VI. INTERPERSONAL RELATIONSHIPS

- 19. Neuropeptides and the Protective Effects of Social Bonds** 425
C. Sue Carter
- 20. The Quiet Revolution of Existential Neuroscience** 439
Marco Iacoboni
- 21. Affiliative Responses to Stress: A Social Neuroscience Model** 454
Shelley E. Taylor and Gian C. Gonzaga
- 22. The Social Neuroscience of Relationships:** 474
 An Examination of Health-Relevant Pathways
Bert N. Uchino, Julianne Holt-Lunstad, Darcy Uno, Rebecca Campo, and Maija Reblin
- Index** 493
