Preface	xi
<b>PART 1. BASIC MATERIAL</b>	<b>1</b>
<b>Chapter 1. Introduction</b>	<b>3</b>
1.1 Dehn Filling and Thurston's Theorem	3
1.2 Definition of a Horotube Group	3
1.3 The Horotube Surgery Theorem	4
1.4 Reflection Triangle Groups	6
1.5 Spherical CR Structures	7
1.6 The Goldman-Parker Conjecture	9
1.7 Organizational Notes	10
<b>Chapter 2. Rank-One Geometry</b>	<b>12</b>
2.1 Real Hyperbolic Geometry	12
2.2 Complex Hyperbolic Geometry	13
2.3 The Siegel Domain and Heisenberg Space	16
2.4 The Heisenberg Contact Form	19
2.5 Some Invariant Functions	20
2.6 Some Geometric Objects	21
<b>Chapter 3. Topological Generalities</b>	<b>23</b>
3.1 The Hausdorff Topology	23
3.2 Singular Models and Spines	24
3.3 A Transversality Result	25
3.4 Discrete Groups	27
3.5 Geometric Structures	28
3.6 Orbifold Fundamental Groups	29
3.7 Orbifolds with Boundary	30
<b>Chapter 4. Reflection Triangle Groups</b>	<b>32</b>
4.1 The Real Hyperbolic Case	32
4.2 The Action on the Unit Tangent Bundle	33
4.3 Fuchsian Triangle Groups	33
4.4 Complex Hyperbolic Triangles	35
4.5 The Representation Space	37
4.6 The Ideal Case	37

Chapter 5. Heuristic Discussion of Geometric Filling	41
5.1 A Dictionary	41
5.2 The Tree Example	42
5.3 Hyperbolic Case: Before Filling	44
5.4 Hyperbolic Case: After Filling	45
5.5 Spherical CR Case: Before Filling	47
5.6 Spherical CR Case: After Filling	48
5.7 The Tree Example Revisited	49
PART 2. PROOF OF THE HST	51
Chapter 6. Extending Horotube Functions	53
6.1 Statement of Results	53
6.2 Proof of the Extension Lemma	54
6.3 Proof of the Auxiliary Lemma	55
Chapter 7. Transplanting Horotube Functions	56
7.1 Statement of Results	56
7.2 A Toy Case	56
7.3 Proof of the Transplant Lemma	59
Chapter 8. The Local Surgery Formula	61
8.1 Statement of Results	61
8.2 The Canonical Marking	62
8.3 The Homeomorphism	63
8.4 The Surgery Formula	64
Chapter 9. Horotube Assignments	66
9.1 Basic Definitions	66
9.2 The Main Result	67
9.3 Corollaries	69
Chapter 10. Constructing the Boundary Complex	72
10.1 Statement of Results	72
10.2 Proof of the Structure Lemma	73
10.3 Proof of the Horotube Assignment Lemma	75
Chapter 11. Extending to the Inside	78
11.1 Statement of Results	78
11.2 Proof of the Transversality Lemma	79
11.3 Proof of the Local Structure Lemma	81
11.4 Proof of the Compatibility Lemma	82
11.5 Proof of the Finiteness Lemma	83
Chapter 12. Machinery for Proving Discreteness	85
12.1 Chapter Overview	85
12.2 Simple Complexes	86

CONTENTS	ix
12.3 Chunks	86
12.4 Geometric Equivalence Relations	87
12.5 Alignment by a Simple Complex	88
<b>Chapter 13. Proof of the HST</b>	<b>91</b>
13.1 The Unperturbed Case	91
13.2 The Perturbed Case	92
13.3 Defining the Chunks	94
13.4 The Discreteness Proof	96
13.5 The Surgery Formula	97
13.6 Horotube Group Structure	97
13.7 Proof of Theorem 1.11	99
13.8 Dealing with Elliptics	100
<b>PART 3. THE APPLICATIONS</b>	<b>103</b>
<b>Chapter 14. The Convergence Lemmas</b>	<b>105</b>
14.1 Statement of Results	105
14.2 Preliminary Lemmas	106
14.3 Proof of the Convergence Lemma I	107
14.4 Proof of the Convergence Lemma II	108
14.5 Proof of the Convergence Lemma III	111
<b>Chapter 15. Cusp Flexibility</b>	<b>113</b>
15.1 Statement of Results	113
15.2 A Quick Dimension Count	114
15.3 Constructing The Diamond Groups	114
15.4 The Analytic Disk	115
15.5 Proof of the Cusp Flexibility Lemma	116
15.6 The Multiplicity of the Trace Map	118
<b>Chapter 16. CR Surgery on the Whitehead Link Complement</b>	<b>121</b>
16.1 Trace Neighborhoods	121
16.2 Applying the HST	122
<b>Chapter 17. Covers of the Whitehead Link Complement</b>	<b>124</b>
17.1 Polygons and Alternating Paths	124
17.2 Identifying the Cusps	125
17.3 Traceful Elements	126
17.4 Taking Roots	127
17.5 Applying the HST	128
<b>Chapter 18. Small-Angle Triangle Groups</b>	<b>131</b>
18.1 Characterizing the Representation Space	131
18.2 Discreteness	132
18.3 Horotube Group Structure	132
18.4 Topological Conjugacy	133

PART 4. STRUCTURE OF IDEAL TRIANGLE GROUPS	137
Chapter 19. Some Spherical CR Geometry	139
19.1 Parabolic $\mathbf{R}$ -Cones	139
19.2 Parabolic $\mathbf{R}$ -Spheres	139
19.3 Parabolic Elevation Maps	140
19.4 A Normality Condition	141
19.5 Using Normality	142
Chapter 20. The Golden Triangle Group	144
20.1 Main Construction	144
20.2 The Proof modulo Technical Lemmas	145
20.3 Proof of the Horocusp Lemma	148
20.4 Proof of the Intersection Lemma	150
20.5 Proof of the Monotone Lemma	151
20.6 Proof of The Shrinking Lemma	154
Chapter 21. The Manifold at Infinity	156
21.1 A Model for the Fundamental Domain	156
21.2 A Model for the Regular Set	160
21.3 A Model for the Quotient	162
21.4 Identification with the Model	164
Chapter 22. The Groups near the Critical Value	165
22.1 More Spherical CR Geometry	165
22.2 Main Construction	167
22.3 Horotube Group Structure	169
22.4 The Loxodromic Normality Condition	170
Chapter 23. The Groups far from the Critical Value	176
23.1 Discussion of Parameters	176
23.2 The Clifford Torus Picture	176
23.3 The Horotube Group Structure	177
Bibliography	181
Index	185
