

Inhaltsverzeichnis

Vorwort	17
Elementarprozesse	19
<i>Duong Dinh TA, Sparrer I, Westhofen M:</i> Ionenkanäle an vestibulären Haarzellen von Meerschweinchen. Von der Pathophysiologie zur Therapie des M. Menière	21
<i>Uebachs M, Isom L, Beck H:</i> Impaired carbamazepine block of persistent Na ⁺ currents at subthreshold voltages in mice lacking accessory beta2 subunits	23
<i>Bauer M, Remy S, Reitze M, Yaari Y, Beck H:</i> Nav1.6 subunits and intrinsic membrane properties in CA ₁ pyramidal neurons	25
<i>Mashukova A, Spehr M, Hatt H, Neubaus EM:</i> β-Arrestin2-mediated internalization of mammalian odorant receptors	27
<i>Weiergräber M, Henry M, Matar N, Krieger A, Hescheler J, Schneider T:</i> The pharmacoresistant Ca _v 2.3 E-/R-type voltage-gated Ca ²⁺ channel in epileptogenesis – Shedding new light on an enigmatic channel	29
<i>Müller A, Kukley M, Uebachs M, Beck H, Dietrich D:</i> Nanodomains of single Ca ²⁺ channels contribute to action potential repolarization in cortical neurons	31
<i>Gebing T, Prochnow N, Schmidt M:</i> Identification of voltage gated calcium channels in neurons in the mammalian nucleus of the optic tract <i>in vitro</i>	33
<i>Günes DA, Florea A-M, Spletstoesser F, Kunz I, Büsselberg D:</i> Anti-cancer drugs elevate intracellular calcium by different mechanisms	35
<i>Moises T, Weis J, Krüttgen K:</i> Proteasomal inhibition alters the endosomal transport and neurotrophic signaling of the Nerve Growth Factor receptor TrkA	37

<i>Mock EP, Juntermanns B, Göpelt K, Büsselberg D: Various „drugs“ influence the respiratory rhythm</i>	39
<i>Husch A, Paehler M, Kloppenburg P: Structural and functional properties of olfactory interneurons in the insect antennal lobe</i>	41
<i>Demmer H, Kloppenburg P: In situ characterization of Kenyon cells of <i>Periplaneta Americana</i></i>	43
Entwicklung/Stammzellen/Apoptosis	45
<i>Neufang S, Specht K, Hausmann M, Güntürkün O, Herpertz-Dahlmann B, Fink GR, Konrad K: Der Einfluss von Steroidhormonen auf die Entwicklung des menschlichen Gehirns</i>	47
<i>Kremer D, Küry P: Identification of p57kip2 as an intrinsic inhibitor of oligodendrocyte differentiation</i>	49
<i>Heinen A, Küry P: The cyclin dependent kinase inhibitor p57kip2 is an intrinsic inhibitor of myelinating Schwann cell differentiation ...</i>	51
<i>Koch P, Opitz T, Steinbeck J, Ladewig J, Driehaus J, Biegler A, Steinfarz B, Brüstle O: Stable and functional neural stem cells from human embryonic stem cells</i>	53
<i>Ladewig J, Koch P, Meiners B, Steinfarz B, Couillard-Despres S, Aigner L, Brüstle O: Lineage selection of doublecortin-positive migratory human ES cell-derived neuroblasts</i>	55
<i>Lehmann S, Moritz S, von Holst A, Faissner A: Identification of a chondroitin sulfate proteoglycan regulated GEF by the induction gene trap technology in neural stem cells</i>	57
<i>Keller C, Koch P, Hack M, Götz M, Brüstle O: Pax6-mediated induction of glutamatergic neurons in embryonic stem cell cultures</i>	59
<i>Waerzeggers Y, Klein M, Himmelreich U, Li H-F, Miletic H, Winkeler A, Jacobs AH: Multi-modal imaging of neural progenitor cells in the rodent brain</i>	61

<i>Scheerer N, Fandrey J, Dünker N: Expression and function of erythropoietin during retinal development</i>	63
<i>Pyziak E, Paunel-Görgülü A, Dünker N: Expression und Regulation von Neurotrophinen und Neurotrophin-Rezeptoren in den physiologischen Zelltodphasen der Mausretina</i>	65
<i>Paunel-Görgülü A, Dünker N: Trefoil factor 2 (TFF2) expression in the murine retina: Pro-apoptotic effect during early programmed cell death</i>	67
<i>Franke AG, Dünker N: Transforming growth factor beta (TGF-β) and bone morphogenetic protein (BMP4) interact in mediating programmed retinal cell death</i>	69
Neurogenetik	71
<i>Friedel S, Saar K, Sauer S, Dempfle A, Walitza S, Freitag C, Wewetzer C, Warnke A, Lesch KP, Herpertz-Dahlmann B, Linder M, Hinney A, Konrad K, Hübner N, Hebebrand J: Association and linkage of allelic variants of the dopamine transporter gene in ADHD</i>	73
<i>Müller T, Reichwald K, Wermter AK, Brönner G, Nguyen TT, Friedel S, Koberwitz K, Engeli S, Lichtner P, Meitinger T, Schäfer H, Hebebrand J, Hinney A: No evidence for an involvement of variants in the cannabinoid receptor gene (CNR1) in obesity in German children and adolescents</i>	75
<i>Mittelstaedt T, Lin W, Padgett D, Feldmann N, Castillo PE, Han W, Schmitz F, Kaeser PS, Südhof TC, Schoch S: Redundant functions of RIM1α and RIM2α in Ca²⁺-triggered neurotransmitter release</i>	77
<i>Grashof J, Pitsch J, Seifert G, Bauerkämper S, Becker A, Schoch S: Functional analysis of components of the presynaptic release machinery in temporal lobe epilepsy</i>	79
Neuroimmunologie	81
<i>Jangouk P, Bernal F, Köhne A, Dehmel T, Hartung HP, Lehmann H, Kieseier BC: The effect of the immunomodulator interferon-beta on myelination <i>in vitro</i></i>	83

Köhne A, Kiehl O, Hartung HP, Kieseier BC, Lehmann HC: Expression of MMP-2 promotes the myelination of dorsal root ganglia neurons *in vitro*: implications for remyelination in the inflamed peripheral nerve 85

Lehmann HC, Köhne A, Hartung HP, Kastenbauer S, Kieseier BC: Axons are the primary targets of nitric oxide mediated injury in an *in vitro* model of inflammatory neuropathy 87

Meyer zu Hörste G, Kiehl O, Hartung HP, Wiendl H, Kieseier BC: Schwann cells as antigen presenting cells in inflammatory neuropathies 89

Zickler P, Jander S: Transcriptional patterns in relapsing autoimmune encephalomyelitis: differences between first and second disease episode 91

Soeder BM, Urbach H, Becker AJ, Schramm J, Elger CE, Bien CG: Aetiology of lesional adult-onset medio-temporal lobe epilepsy 93

Motorik/Sensorik/Schmerz 95

Westmark S, Büschges A, Schmidt J: Motoneuron activity during walking in stick insects involves 2nd messenger pathways 97

von Uckermann G, Büschges A: Local premotor nonspiking interneurons in the control of stick insect single leg walking 99

Zehl L, Büschges A, Gruhn M: Kinematic analysis of straight and curve walking in the stick insect walking on a slippery surface setup 101

Bläsing B: Crossing large gaps: a simulation study of stick insect behaviour 103

Schneider S, Brümmer V, Strüder HK: „Brains in Space“ – Weightlessness or stress? Possible impacts on motor control 105

Mierau A, Girgenrath M, Bock O: Effects of changed gravity upon isometric force production and the role of proprioception and stress level 107

<i>Göbel S, Bock O, Noppe A, Pongratz H, Krause W</i> : Hypergravity degrades manual performance with an isometric but not with a movable joystick	109
<i>Gresikiewicz K, Weigelt C</i> : Grasping two objects with both hands: effects of movement execution and distractor display on bimanual kinematics	111
<i>Grefkes C, Eickhoff SB, Nowak DA, Dafotakis M, Fink GR</i> : Task dependent modulation of effective connectivity reveals the intrinsic organisation of the human cortical motor system	113
<i>Schmitz G, Bock O</i> : Concurrent adaptations to sensorimotor discordances depend on their localization in the sensorimotor system	115
<i>Naglatzki R, Schlamann M, Forsting M, Gizewski E</i> : Autogenes Training im fMRT: Nachweisbare Wirkung	117
<i>Lewien T, Catizzone M, Weigelt C, Bock O</i> : The extent of adaptation in prehension to object rotation depends on direction and pre-exposure	119
<i>Kronenbürger M, Gerwig M, Brol B, Fromm C, Coenen V, Kiening K, Tronnier V, Timmann D</i> : Beeinträchtigung der Blinkreflexkonditionierung/des motorischen Lernens beim essentiellen Tremor und Modulation durch die Tiefe Hirnstimulation	121
<i>Thomas M, Bock O, Rohde V</i> : Adaptation to visual and mechanical distortions is governed by common processes	123
<i>Elgeti A, Knief A, Matulat P, Schmidt CM, am Zehnhoff-Dinnesen A</i> : Erhöhte Prävalenz spontaner otoakustischer Emissionen bei Kindern mit selektiver Hörstörung	125
<i>Zvyagintsev M, Thönnessen H, Swirszcz K, Dammers J, Mathiak K</i> : Is processing in auditory area affected by congruency with visual stimuli?	127
<i>Platzen J, Pollok B, Gross J, Schnitzler A, Ploner M</i> : Charakterisierung schmerzinduzierter kortikaler Erregbarkeitsveränderungen	129

<i>Janeschik S, Paul T, Esser S, Schlamann M, Gizewski ER, Forsting M, de Greiff A</i> : Brain activation elicited by the sensation of itch: a functional magnetic resonance imaging study	131
<i>Hagenacker T, Ledwig D, Neuendorf A, Czeschik C, Schäfers M, Büsselberg D</i> : New pharmaceu- tic interventions in the therapy of chronic pain	133
Neurologie	137
<i>Lee J-I, Zickler P, Jander S</i> : tPA and MMP-9 interactions in focal cerebral ischemia: distinct mechanisms of gene regulation	139
<i>Bosche B, Dohmen C, Graf R, Reithmeier T, Brinker G, Sobesky J, Ernestus R-I, Heiss W-D</i> : Identification and clinical impact of impaired cerebrovascular autoregulation in patients with malignant MCA infarction	141
<i>Kipp M, Karakaya S, Beyer C</i> : Estrogens influence on neuronal cell loss in the MPTP model for Parkinson disease	143
<i>Herring A, Yasin H, Ambrée O, Sachser N, Paulus W, Keyvani K</i> : Enhanced clearance of Alzheimer's beta-amyloid peptide across the blood-brain barrier caused by environmental enrichment	145
<i>Reck C, Gross J, Ostrowski S, Krause H, Groiss S, Wojtecki L, Ploner M, Südmeyer M, Voges J, Sturm V, Schnitzler A, Timmermann L</i> : Räumliche und zeitlich-dynamische Kohärenzanalyse zwischen lokalen Feldpotentialen im Nucleus ventralis intermedius thalami und Tremor EMG Aktivität bei Patienten mit Multipler Sklerose	147
<i>Bliem B, Pirio Richardson S, Dang N, Dinse H, Hallett M</i> : Changes in long-afferent inhibition during phasic finger movement in focal hand dystonia	149
<i>Obermann M, Yaldizli O, de Greiff A, Lachenmayer ML, Tumczak F, Buhl AR, Gizewski ER, Diener HC, Maschke M</i> : Morphometric changes of sensorimotor structures in focal dystonia	151

<i>Quesada CM, Reinartz A, Elger CE, Weber B</i> : Application of an isotropic 3-dimensional FLAIR sequence for VBM-based detection of hippocampal pathologies	153
<i>Buss A, Pech K, Noth J, Brook GA</i> : Growth-modulating molecules are associated with invading Schwann cells and not astrocytes in human traumatic spinal cord injury	155
<i>Selter L, Obermann M, Katsarava Z, Esser S, Sommer C, He L, Müller D, Diener HC, Maschke M</i> : Korrelation der intraepidermalen Nervenfaserdichte mit schmerzevozierten Potentialen bei HIV induzierter „small fiber“ Neuropathie	157
<i>Yoon M-S, Katsarava Z, Dzagnidze A, Schäfers M, Liedert B, Kribben A, Limmroth V, Diener H-C, Thomale J</i> : Exogenous erythropoietin ameliorates cisplatin-induced neurotoxicity in mice	159
<i>Sommer J, Flöel A, Jansen A, Steinträger O, Knecht S</i> : Therapeutische Perspektiven der Transkraniellen Magnetischen Stimulation: Problem Stimulationsintensität	161
<i>Schaaf M, Gandolfo C, Krings T, Baccin CE, Lasjaunias P</i> : Sinus Pericranii: Diagnostische und therapeutische Konzepte	163
Neuropsychologie/Psychiatrie	165
<i>Eickhoff SB, Hunter MD, Miller TW, Wilkinson ID, Zilles K, Woodruff PW</i> : Do we just not hear the voices? – Spontaneous activation of auditory cortex during silence in healthy adults	167
<i>Müller R, Brockhaus-Dumke A, Popovych S, Küpper T, Klosterkötter J, Faigle U</i> : EEG-Oszillationen: Ein wichtiger Schlüssel zum Verständnis von Störungen in der frühen Informationsverarbeitung	169
<i>Hübner T, Vloet TD, Marx I, Konrad K, Fink GR, Herpertz SC, Herpertz-Dahlmann B</i> : Strukturelle und funktionelle Veränderungen des Gehirns bei Kindern mit Störung des Sozialverhaltens und komorbidem Aufmerksamkeitsdefizit-/Hyperaktivitätssyndrom	171
<i>Gaertner K, Buderath P, Frings M, Christiansen H, Schoch B, Dimitrova A, Gizewski ER, Hebebrand J, Timmann D</i> : Motor dysfunction in children with attention deficit hyperactivity disorder (ADHD)	173

<i>Sinzig JK, Morsch D, Bruning N, Lehmkuhl G</i> : Neuropsychological differences in autistic children with and without comorbid ADHD .	175
<i>Christiansen H, Röhrle B, Hauffa B, Oades RD</i> : Expressed Emotion, stress coping, cortisol and the child: an experiment	177
<i>Dannlowski U, Ohrmann P, Bauer J, Kugel H, Arolt V, Heindel W, Kersting A, Baune BT, Suslow T</i> : Amygdala reactivity to masked negative faces is associated with automatic judgmental bias in major depression	179
<i>Schnell K, Daumann J, Schnell T, Neukirch A, Möller-Hartmann W, Heekeren K</i> : An fMRI study of changes in the functional network of action monitoring associated with psychotic ego-disturbances	181
<i>Daumann J, Heekeren K, Neukirch A, Thiel C, Gouzoulis-Mayfrank E</i> : Pharmacological modulation of Inhibition of Return (IOR) in the human 5-HT _{2A} agonist and NMDA antagonist model of psychosis	183
Kognition	185
<i>Harmening W, Goebbels K, Wagner H</i> : Barn owls can discriminate spatially non-aligned features in visual stimuli with hyperacute precision	187
<i>Schulte-Rüther M, Markowitsch HJ, Fink GR, Piefke M</i> : The role of mirror neurons and theory of mind in face-to-face interactions: an fMRI approach to empathy	189
<i>Weigelt M, Danek A, Prinz W</i> : Neuro-cognitive constraints on the production of bimanual actions: evidence from patients with persistent mirror-movements	191
<i>Beck L, Vohn R, Sturm W</i> : On the functional anatomy of internally and externally triggered alerting: an fMRI study	193
<i>Lenz M, Langbein K, de Greiff A, Forsting M, Hesse A, Sartory G, Hoffmann K-P, Müller BW</i> : Mismatch-Negativity and the effect of stimulus predictability: an fMRI-study	195

<i>Minnebusch DA, Suchan B, Ramon M, Daum I</i> : Event-related potentials reflect heterogeneity of developmental prosopagnosia	197
<i>Vossel S, Kukuljca J, Thiel CM, Fink GR</i> : Pharmacological modulation of visuospatial attention in healthy subjects and patients with chronic spatial neglect	199
<i>Onur ÖA, Piefke M, Lie CH, Thiel CM, Fink GR</i> : Modulation of cognitive control processes with levodopa in young and elderly subjects: a pharmacological fMRI study	201
<i>Heber IA, Kronenbuerger M, Fromm C, Coenen VA, Block F, Fimm B</i> : The interaction of Deep Brain Stimulation and attentional functions in Parkinson's disease patients	203
<i>Krach S, Gollas M, Heinze K, Ohm B, Macek C</i> : Involuntary exposure to a cell-phone conversation while reading affects cerebral blood flow velocity. A study with functional Transcranial Doppler Sonography	205
<i>Ludowig E, Trautner P, Kurthen M, Schaller C, Bien C, Elger CE, Rosburg T</i> : Hippocampal event-related potentials (ERPs) in a word recognition paradigm	207
<i>Heim S, Friederici AD, Schiller NO, Rüschemeyer SA, Amunts K</i> : The neural basis of the determiner congruency effect in language production	209
<i>Jansen A, Scharfe S, Lohmann H, Sehlmeier C, Deppe M, Knecht S</i> : Der Zusammenhang zwischen Haarwirbelrichtung, Händigkeit und Sprachdominanz: Gibt es einen gemeinsamen genetischen Mechanismus?	211
<i>Mohammadi S, Jansen A, Schwindt W, Knecht S, Deppe M</i> : Anatomical correlates of right-hemispheric language processing: a diffusion tensor imaging study	213
<i>Staedtgen M, Meister IG, Straube B, Green A, Kircher TT, Sparing R</i> : Hemisphärische Lateralisierung der Verarbeitung von Sprache und Gestik – eine TMS Studie zur funktionellen Konnektivität zwischen Hand- und Spracharealen	215

<i>Weber B, Lange N, Kügler F, Elger CE: Relationship of language- and memory-dominance – correlation of mediotemporal activation in different memory-encoding paradigms to language dominance</i>	217
<i>Kim SK, Müller HM: Factors for bilingual brain organization: an ERP study with Korean-German bilinguals</i>	219
<i>Yen HL, Liu HL, Lee CY, Ng YB, Müller HM: Are proper names mono-referential and carrying less meaning? Neuroimaging evidence in Mandarin Chinese</i>	222
<i>Nickel J, Langen K-J, Stoffels G, Sabel MC, Steiger H-J, Seitz RJ: Stereotaktische Koregistrierung von Sprachaktivierung und Aminosäure-Markierung bei Patienten mit linkshemisphärischen Hirntumoren</i>	225
<i>Axmacher N, Cohen MX, Fell J, Walsh BJ, Haupt S, Elger CE, Schlaepfer TE, Sturm V, Ranganath C: Human nucleus accumbens facilitates memory formation in the hippocampus</i>	227
<i>Ambrée O, Richter H, Keyvani K, Paulus W, Schäbitz WR, Sachser N: L-DOPA improves object recognition memory in transgenic mice modelling Alzheimer’s disease</i>	229
<i>Haupt S, Axmacher N, Elger CE, Fell J: Working memory load affects long-term memory formation</i>	231
<i>Soei E, Groll B, Kapplusch J, Schulz R, Mette C, Daum I: Differential course of relational memory and merged-unity-memory across aging</i>	233
<i>Kohn N, Kalbe E, Wölk C, Kessler J: Electrodermal reactivity of Alzheimer patients in implicit person recognition</i>	235
<i>Müller A, Schmidt V, Heuthe J, Peters J: Reduced contribution of recollection to the concreteness effect during normal aging</i>	237
<i>Sehlmeyer C, Pfliederer B, Zwitserlood P, Knecht S, Jansen A: Material-spezifische Lateralisation beim Einspeichern von Informationen – Eine fMRT-Studie</i>	239

<i>Peters J, Suchan B, Köster O, Koch B, Schwarz M, Daum I: Modality-dependent organization of episodic retrieval in the human medial temporal lobe: converging evidence from neuroimaging and lesion data</i>	241
<i>Fließbach K, Weber B, Trautner P, Dohmen T, Sunde U, Elger CE, Falk A: The brain's reaction to unfair payment: reward related brain activity strongly depends on social comparison</i>	243
<i>Neuhaus C, Weber B, Aholt A, Teichert T, Elger CE: Rational decision making? Neurophysiological correlates to subjective utility evaluations in real market transactions before and after choice – an fMRI study</i>	245
<i>Vorhold V, Giessing C, Wiedemann PM, Schütz H, Gauggel S, Fink GR: An fMRI study on the neural mechanisms underlying risk judgments</i>	247
<i>Paszek J, Niedeggen M, Kessler J: Reaction times in a priming task as a means of detecting malingerers</i>	249
<i>Cohen MX, Axmacher N, Lenartz D, Elger CE, Sturm V, Schlaepfer TE: Electrophysiological activity in the human nucleus accumbens during risk-taking and reward learning</i>	251
Computational Neurosciences/Brain Mapping	253
<i>Döhler F, Weber B, Mormann F, Elger CE, Lehnertz K: A cellular neural network based method for classification of magnetic resonance images: an application to mesial temporal sclerosis</i>	255
<i>Meyer J, Jancke D, Igel C: Modelling cortical activity underlying apparent and real motion perception</i>	257
<i>Schütz C, Zakotnik J, Dürr V: VideoTrackM – A model-based motion capture application for Matlab allowing kinematic analysis of unrestrained moving animals</i>	259
<i>Stausberg S, Weber B, Elger CE, Lehnertz K: A nonlinear noise reduction method in state space for fMRI time series</i>	261

Ukas T, Schöning S, Wortmann V, Fuchs A, Schiffbauer H, Brote I, Engeli A, Kugel H, Arolt V, Narr K, Konrad C: Entwicklung eines Segmentierprotokolls für hohe MRT-Feldstärken und dreidimensionale Oberflächenmodellierung des Hippocampus 263

Rottschy C, Eickhoff SB, Kujovic M, Schleicher A, Palomero-Gallagher N, Amunts K, Zilles K: Dorso-ventral differences within the third visual area – a receptor architectonic study 265

Wissenschaftliche Jury 267

Preisträger des Posterwettbewerbs 2006 269
