

Contents

Chapter 1. Introduction	1
1.1. Quasi-periodic solutions for the n -body problem	1
1.2. A stability theorem for the Sun-Jupiter-Victoria system viewed as a restricted, circular, planar three-body problem	3
1.3. About the proof of the Sun-Jupiter-Victoria stability theorem	6
1.4. A short history of KAM stability estimates	8
1.5. A section-by-section summary	10
Chapter 2. Iso-energetic KAM Theory	13
2.1. Notations	13
2.2. KAM tori	15
2.3. Newton scheme for finding iso-energetic KAM tori	16
2.4. The KAM Map	27
2.5. Technical Tools	28
2.6. The KAM Norm Map	36
2.7. Iso-energetic KAM Theorem	48
2.8. Iso-energetic Lindstedt series	70
Chapter 3. The Restricted, Circular, Planar Three-body Problem	75
3.1. The restricted three-body problem	75
3.2. Delaunay action-angle variables for the two-body problem	75
3.3. The restricted, circular, planar three-body problem viewed as nearly-integrable Hamiltonian system	84
3.4. The Sun-Jupiter-Asteroid problem	89
Chapter 4. KAM Stability of the Sun-Jupiter-Victoria Problem	95
4.1. Iso-energetic Lindstedt series for the Sun-Jupiter-Asteroid problem and choice of the initial approximate tori $(u^{(0)\pm}, v^{(0)\pm}, \omega^{(0)\pm})$	96
4.2. Evaluation of the input parameters of the KAM norm map associated to the approximate tori $(u^{(0)\pm}, v^{(0)\pm}, \omega^{(0)\pm})$	100
4.3. Iterations of the KAM map	108
4.4. Application of the iso-energetic KAM theorem and perpetual stability of the Sun-Jupiter-Victoria problem	112
Appendix A. The Ellipse	117
Appendix B. Diophantine Estimates	121
B.1. Diophantine estimates for special quadratic numbers	121
B.2. Estimates on $s_{p,k}(\delta)$	122
Appendix C. Interval Arithmetic	125

Appendix D. A Guide to the Computer Programs	127
Bibliography	129
