Figures and tables	x
Preface	xv
Abbreviations	xvii
1. Introduction	1
1.1 Subject of investigation	1
1.2 Theoretical approach	4
1.3 The language under investigation: Yucatec Maya	5
1.3.1 Some general information	5
1.3.2 Previous research on Yucatec Maya	6
1.3.3 Orthographical conventions	7
1.4 Methodological approach and data collection	8
1.5 General objectives and outline of the present work	9
2. Theoretical preliminaries	13
2.1 Conceptualization of a situation	13
2.1.1 General	13
2.1.2 Situation types and their features	15
2.1.3 Participant properties	18
2.1.4 Participant roles and semantic roles	19
2.2 On the interrelation of syntax and semantics	24
2.2.1 A hierarchy of grammatical relations	24
2.2.2 Linking between semantic roles and grammatical relations	25
2.2.3 A typology of person vs. relation prominence	25
2.3 A construction-based approach	27
3. Universals and typology of experiential constructions	35
3.1 Earlier approaches to experiential constructions	35
3.2 The functional domain of experience	38
3.2.1 Universality vs. culture-specificity	39
3.2.2 The structure of the subdomains of experience	41
3.3 The experiential situation	51
3.3.1 Components of an experiential situation	51
3.3.2 Participant roles in an experiential situation	54
3.3.3 Experiential situation types	66

3.4	Grammatical coding of experience	69
3.4.1	Introduction	69
3.4.2	Types of predicates	69
3.4.3	Experiential construction types	74
3.4.4	Experiencer coding and syntactic prominence	86
3.5	Figurative language and types of collocations	87
3.5.1	Distinguishing between figurative and literal language	88
3.5.2	Figures in the target domain	89
3.5.3	Semantic roles in the analysis of figurative language	93
3.5.4	Types of experiential collocations	93
3.6	Diachronic development	95
4.	Introduction to Yucatec Maya	99
4.1	Basic structures	99
4.1.1	Short typological characterization	99
4.1.2	Dependent and independent pronouns	100
4.1.3	Internal clause structure	102
4.1.4	Deictic clitics	104
4.1.5	Nominal categories	105
4.1.6	Verbal categories	108
4.1.7	Aspectual and modal markers and auxiliaries	116
4.1.8	Word classes in predicate function	117
4.2	Complex constructions	125
4.2.1	Subordination and embedding	125
4.2.2	Predicate marking under subordination	128
4.3	Grammatical relations	134
4.3.1	Preliminaries	134
4.3.2	Coding properties	135
4.3.3	Behavioral (subject) properties	136
4.3.4	Direct object vs. indirect object	144
4.3.5	Possessor and absolutive argument of stative predicates	147
5.	Experiential constructions	151
5.1	General remarks	151
5.1.1	Outline of the chapter	151
5.1.2	Testing situation and role features in YM	151
5.1.3	The representation of constructions	155
5.2	Stative predicate constructions	155
5.2.1	Adjectival constructions	155
5.2.2	Verboid constructions	182
5.3	Verbal constructions	199
5.3.1	Intransitive constructions	199
5.3.2	Transitive constructions	219

5.3.3	Ditransitive constructions	257
5.4	Summary: Evaluation of coding strategies	260
5.4.1	Word classes in experience	260
5.4.2	Subdomain-specific assessment	262
5.4.3	Congruent vs. non-congruent expressions	266
5.4.4	Person part constructions	266
6.	Grammatical properties of experiencers	269
6.1	Coding properties	269
6.2	Behavioral properties	270
6.2.1	Cleft constructions	270
6.2.2	'Equi-deletion' in subordinate clause/core	272
6.2.3	Imperative formation	275
6.2.4	Passivization	277
6.2.5	Summary: Syntactic prominence of experiencer	277
6.3	Experiencer coding in collocations vs. phrasal compounds	279
6.4	Experiencer in indirect object function	280
6.5	Pragmatic prominence of experiencers	287
6.6	Summary	287
7.	Complementation with experiential predicates	291
7.1	Introduction	291
7.1.1	Syntactic relation of subordinate clause	291
7.1.2	Semantic criteria	292
7.2	Perception	293
7.3	Cognition	297
7.3.1	Knowledge	297
7.3.2	Propositional attitude	301
7.4	Emotion and Volition	304
7.4.1	Commentative emotion	305
7.4.2	Volition and volitive emotion	313
7.5	Summary	321
7.5.1	Types of complementation	321
7.5.2	The evidential role of perception verbs in subordination	325
7.5.3	Verbal categories in matrix and subordinate clause	326
8.	Person and body parts in experiential collocations	329
8.1	Person parts	329
8.1.1	<i>óol</i>	329
8.1.2	<i>iik'</i>	333
8.2	Body parts	335
8.2.1	<i>puksi'k'al</i>	335
8.2.2	<i>pòol / ho'l</i>	337
8.2.3	Body parts of perception	337

8.2.4	Other	339
8.3	Summary	340
9.	Conclusions	343
9.1	Experiential construction types	343
9.1.1	Possessive constructions	343
9.1.2	Adjectival and intransitive constructions	347
9.1.3	Transitive constructions	350
9.1.4	Ditransitive constructions	352
9.2	Typological characterization of YM experiential constructions	352
9.2.1	Predicate classes in the domain of experience	352
9.2.2	Experiencer coding and syntactic prominence	354
9.2.3	Grammaticalization of experiencer role	356
