

# Dedicated to I. G. Petrovskii

## CONTENTS

INTRODUCTION .....	1
CHAPTER I. THE FIRST BOUNDARY VALUE PROBLEM .....	15
1. Notation. Auxiliary results. Formulation of the first boundary value problem .....	15
2. A priori estimates in the spaces $\mathfrak{L}_p(\Omega)$ .....	22
3. Existence of a solution of the first boundary value problem in the spaces $\mathfrak{L}_p(\Omega)$ .....	25
4. Existence of a weak solution of the first boundary value problem in Hilbert space .....	28
5. Solution of the first boundary value problem by the method of elliptic regularization .....	30
6. Uniqueness theorems for weak solutions of the first boundary value problem .....	41
7. A lemma on nonnegative quadratic forms .....	64
8. On smoothness of weak solutions of the first boundary value problem. Conditions for existence of solutions with bounded derivatives .....	66
9. On conditions for the existence of a solution of the first boundary value problem in the spaces of S. L. Sobolev .....	102
CHAPTER II. ON THE LOCAL SMOOTHNESS OF WEAK SOLUTIONS AND HYPO-ELLIPTICITY OF SECOND ORDER DIFFERENTIAL EQUATIONS .....	114
1. The spaces $\mathcal{H}_s$ .....	114
2. Some properties of pseudodifferential operators .....	125
3. A necessary condition for hypoellipticity .....	139
4. Sufficient conditions for local smoothness of weak solutions and hypoellipticity of differential operators .....	142
5. A priori estimates and hypoellipticity theorems for the operators of Hörmander .....	157

6. A priori estimates and hypoellipticity theorems for general second order differential equations .....	177
7. On the solution of the first boundary value problem in nonsmooth domains. The method of M. V. Keldyš .....	194
8. On hypoellipticity of second order differential operators with analytic coefficients .....	199
<b>CHAPTER III. ADDITIONAL TOPICS .....</b>	<b>208</b>
1. Qualitative properties of solutions of second order equations with non-negative characteristic form .....	208
2. The Cauchy problem for degenerating second order hyperbolic equations .....	220
3. Necessary conditions for correctness of the Cauchy problem for second order equations .....	237
<b>BIBLIOGRAPHY .....</b>	<b>251</b>
