

# TABLE OF CONTENTS

PREFACE . . . . .	iii
INTRODUCTION . . . . .	1
CHAPTER I. EQUATIONS OF FIRST ORDER WITH CONSTANT OPERATOR. SEMIGROUPS . . . . .	24
1. The Cauchy problem . . . . .	24
2. Uniformly correct Cauchy problem. . . . .	42
3. Weakened Cauchy problem . . . . .	59
4. Equations in Hilbert space . . . . .	82
5. Fractional powers of operators. . . . .	108
6. Nonhomogeneous equations . . . . .	129
7. Equations with perturbed operators . . . . .	143
8. Examples . . . . .	158
CHAPTER II. EQUATIONS OF THE FIRST ORDER WITH VARIABLE OPERATOR . . . . .	176
1. Unbounded operators depending on a parameter . . . . .	176
2. Equations with bounded operators . . . . .	188
3. The uniformly correct Cauchy problem . . . . .	192
4. Weakened Cauchy problem . . . . .	209
5. Abstract parabolic equations with operators having variable domains . . . . .	228
CHAPTER III. EQUATIONS OF SECOND ORDER. . . . .	238
1. The hyperbolic case. The Cauchy problem . . . . .	238
2. The elliptic case. Boundary problems . . . . .	249
3. The Cauchy problem for the complete equation of the second order. . . . .	270
CHAPTER IV. ASYMPTOTIC METHODS. . . . .	283
1. Equations with a small parameter on the highest derivative . . . . .	283
2. Evolution of subspaces in Banach space . . . . .	297
3. Splitting of an equation into equations in subspaces . . . . .	309
CHAPTER V. FINITE-DIFFERENCE METHODS . . . . .	333
1. Factor-method of solution of operator equations . . . . .	333
2. Finite-difference factor-method for evolution equations . . . . .	340
REMARKS AND REFERENCES TO THE LITERATURE . . . . .	362
BIBLIOGRAPHY . . . . .	377
