

C O N T E N T S

J.L.Lions	Some topics on variational inequalities and applications	1
G.Stampacchia	Free boundary problems for Poisson's equation	39
H.Amann	Nonlinear elliptic equations with nonlinear boundary conditions	43
H.Brezis	On the range of the sum of nonlinear operators	65
L.A.Peletier	On the asymptotic behaviour of solutions of an equation arising in population genetics	73
C.Cuvelier	Optimal control of a system governed by the Navier-Stokes equations coupled with the heat equation	81
G.Iooss	Secondary or direct bifurcation of a steady solution of the Navier-Stokes equations into an invariant torus	99
W.A.Harris Jr.	Application of the method of differential inequalities in singular perturbation problems	111
P.P.N.de Groen	A singular perturbation problem of turning point type	117
B.Kaper	Asymptotics for a class of perturbed initial value problems	125
H.-D.Niessen	On the solutions of perturbed differential equations	135
W.N.Everitt and M.Giertz	On certain ordinary differential expressions and associated integral inequalities	161
Å.Pleijsel	On Legendre's polynomials	175
W.Jurkat, D.A.Lutz and A.Peyerimhoff	Invariants and canonical forms for meromorphic second order differential equations.	181
C.G.Lekkerkerker	On generalized eigenfunctions and linear transport theory	189
A.Dijkma	Integral-ordinary differential-boundary subspaces and spectral theory	199
R.Martini	Some degenerated differential operators on vector bundles	213
