

CONTENTS

		Page
Chapter	1	BASIC CONCEPTS 1
		Ordinary Differential Equations. Order and Degree. Linear Differential Equations. Notation.
<hr/>		
Chapter	2	SOLUTIONS 4
		Definition of Solution. Particular and General Solutions. Initial-Value Problems. Boundary-Value Problems.
<hr/>		
Chapter	3	CLASSIFICATION OF FIRST-ORDER DIFFERENTIAL EQUATIONS 10
		Standard Form and Differential Form. Linear Equations. Homogeneous Equations. Separable Equations. Exact Equations.
<hr/>		
Chapter	4	SEPARABLE FIRST-ORDER DIFFERENTIAL EQUATIONS 14
		General Solution. Initial-Value Problem.
<hr/>		
Chapter	5	HOMOGENEOUS FIRST-ORDER DIFFERENTIAL EQUATIONS 18
		First Method of Solution. Alternate Method of Solution.
<hr/>		
Chapter	6	EXACT FIRST-ORDER DIFFERENTIAL EQUATIONS 23
		Definition. Method of Solution.
<hr/>		
Chapter	7	INTEGRATING FACTORS 27
		What is an Integrating Factor? Solution by Use of an Integrating Factor. Finding an Integrating Factor.
<hr/>		
Chapter	8	LINEAR FIRST-ORDER DIFFERENTIAL EQUATIONS 33
		An Integrating Factor. Method of Solution.
<hr/>		
Chapter	9	APPLICATIONS OF FIRST-ORDER DIFFERENTIAL EQUATIONS 37
		Problems in Cooling. Growth and Decay Problems. Falling Bodies with Air Resistance. Dilution Problems. Electrical Circuits. Orthogonal Trajectories.
<hr/>		
Chapter	10	LINEAR DIFFERENTIAL EQUATIONS: GENERAL REMARKS 53
		Definitions. Uniqueness Theorem. The Linear Differential Operator.
<hr/>		
Chapter	11	LINEAR DIFFERENTIAL EQUATIONS: THEORY OF SOLUTIONS 57
		Linear Dependence. Linear Independence. Linearly Independent Solutions. The Wronskian.

		Page
Chapter 12	SECOND-ORDER LINEAR HOMOGENEOUS DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS	63
	The Characteristic Equation. Solution in Terms of the Characteristic Roots.	
<hr/>		
Chapter 13	nTH-ORDER LINEAR HOMOGENEOUS DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS	67
	The Characteristic Equation. Solution in Terms of the Characteristic Roots.	
<hr/>		
Chapter 14	THE METHOD OF UNDETERMINED COEFFICIENTS	70
	Simple Form of the Method. Modifications. Generalizations. Limitations of the Method.	
<hr/>		
Chapter 15	VARIATION OF PARAMETERS	76
	Variation of Parameters. Scope of the Method.	
<hr/>		
Chapter 16	INITIAL-VALUE PROBLEMS	81
<hr/>		
Chapter 17	APPLICATIONS OF SECOND-ORDER LINEAR DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS	84
<hr/>		
Chapter 18	LINEAR DIFFERENTIAL EQUATIONS WITH VARIABLE COEFFICIENTS	93
	Introduction. Analytic Functions. Ordinary Points and Singular Points.	
<hr/>		
Chapter 19	POWER-SERIES SOLUTIONS ABOUT AN ORDINARY POINT	97
	Method for Homogeneous Equations. Method for Nonhomogeneous Equations.	
<hr/>		
Chapter 20	REGULAR SINGULAR POINTS AND THE METHOD OF FROBENIUS	108
	Existence Theorem. Method of Frobenius. General Solution.	
<hr/>		
Chapter 21	GAMMA FUNCTION. BESSEL FUNCTIONS	123
	Gamma Function. Bessel Functions. Algebraic Operations on Infinite Series.	
<hr/>		
Chapter 22	THE LAPLACE TRANSFORM	131
	Improper Integrals. Definition of the Laplace Transform. Convergence of the Laplace Transform.	
<hr/>		
Chapter 23	PROPERTIES OF THE LAPLACE TRANSFORM	138
<hr/>		
Chapter 24	INVERSE LAPLACE TRANSFORMS	145
	Definition. Uniqueness Theorem. Method of Completing the Square. Method of Partial Fractions.	
<hr/>		
Chapter 25	CONVOLUTIONS AND THE UNIT STEP FUNCTION	152
	Convolution. Unit Step Function.	

	Page
Chapter 26 SOLUTIONS OF LINEAR DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS BY LAPLACE TRANSFORMS	158
Laplace Transforms of Derivatives. Solution of the Initial-Value Problem.	
<hr/>	
Chapter 27 SOLUTIONS OF SYSTEMS OF LINEAR DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS BY LAPLACE TRANSFORMS	164
<hr/>	
Chapter 28 MATRICES	168
Matrices and Vectors. Matrix Addition. Scalar and Matrix Multiplication. Identity and Zero Matrices. Powers of a Square Matrix. Differentiation and Integration of Matrices. The Characteristic Equation.	
<hr/>	
Chapter 29 e^{At}	177
Definition. Computation of e^{At} .	
<hr/>	
Chapter 30 REDUCTION OF LINEAR DIFFERENTIAL EQUATIONS TO A FIRST-ORDER SYSTEM	185
<hr/>	
Chapter 31 SOLUTIONS OF LINEAR SYSTEMS WITH CONSTANT COEFFICIENTS	193
Introduction. Solution of the Initial-Value Problem. Comparison of Solution Methods.	
<hr/>	
Chapter 32 SIMPLE NUMERICAL METHODS	201
General Remarks. Euler's Method. Heun's Method. Three-Term Taylor Series Method. Nystrom's Method. Order of a Numerical Method.	
<hr/>	
Chapter 33 RUNGE-KUTTA METHODS	223
Introduction. A Third-Order Runge-Kutta Method. A Fourth-Order Runge-Kutta Method.	
<hr/>	
Chapter 34 PREDICTOR-CORRECTOR METHODS	232
Introduction. A Second-Order Method. Milne's Method. Hamming's Method. Starting Values.	
<hr/>	
Chapter 35 MODIFIED PREDICTOR-CORRECTOR METHODS	248
Introduction. Modified Milne's Method. Modified Hamming's Method. Starting Values.	
<hr/>	
Chapter 36 NUMERICAL METHODS FOR SYSTEMS	258
General Remarks. Euler's Method. A Fourth-Order Runge-Kutta Method. Milne's Method. Hamming's Method.	
<hr/>	
Chapter 37 SECOND-ORDER BOUNDARY-VALUE PROBLEMS	274
Homogeneous and Nonhomogeneous Problems. Uniqueness of Solutions. Eigenvalue Problems.	

CONTENTS

	Page
Chapter 38 STURM-LIOUVILLE PROBLEMS	281
Definition. Properties of Sturm-Liouville Problems.	
<hr/>	
Chapter 39 EIGENFUNCTION EXPANSIONS	286
Piecewise Smooth Functions. Fourier Sine Series. Fourier Cosine Series.	
<hr/>	
Appendix A THE GAMMA FUNCTION ($1.00 \leq x \leq 1.99$)	293
<hr/>	
Appendix B BESSEL FUNCTIONS ($0.0 \leq x \leq 14.9$)	294
<hr/>	
Appendix C ADDITIONAL LAPLACE TRANSFORMS	297
<hr/>	
INDEX	303
