

TABLE OF CONTENTS

	<i>Preface</i>	<i>ix</i>
Part One	<i>Realigning Usability and Security</i>	<i>xxi</i>
1	<i>Psychological Acceptability Revisited</i> <i>Matt Bishop</i>	<i>1</i>
2	<i>Usable Security</i> <i>M. Angela Sasse and Ivan Flechais</i>	<i>13</i>
3	<i>Design for Usability</i> <i>Bruce Tognazzini</i>	<i>31</i>
4	<i>Usability Design and Evaluation for Privacy and Security Solutions</i> <i>Clare-Marie Karat, Carolyn Brodie, and John Karat</i>	<i>47</i>
5	<i>Designing Systems That People Will Trust</i> <i>Andrew S. Patrick, Pamela Briggs, and Stephen Marsh</i>	<i>75</i>
Part Two	AUTHENTICATION MECHANISMS	<i>101</i>
6	<i>Evaluating Authentication Mechanisms</i> <i>Karen Renaud</i>	<i>103</i>
7	<i>The Memorability and Security of Passwords</i> <i>Jeff Yan, Alan Blackwell, Ross Anderson, and Alasdair Grant</i>	<i>129</i>
8	<i>Designing Authentication Systems with Challenge Questions</i> <i>Mike Just</i>	<i>143</i>
9	<i>Graphical Passwords</i> <i>Fabian Monrose and Michael K. Reiter</i>	<i>157</i>
10	<i>Usable Biometrics</i> <i>Lynne Coventry</i>	<i>175</i>
11	<i>Identifying Users from Their Typing Patterns</i> <i>Alen Peacock, Xian Ke, and Matt Wilkerson</i>	<i>199</i>
12	<i>The Usability of Security Devices</i> <i>Ugo Piazzalunga, Paolo Salvaneschi, and Paolo Coffetti</i>	<i>221</i>

Part Three	SECURE SYSTEMS	245
13	<i>Guidelines and Strategies for Secure Interaction Design</i> Ka-Ping Yee	247
14	<i>Fighting Phishing at the User Interface</i> Robert C. Miller and Min Wu	275
15	<i>Sanitization and Usability</i> Simson Garfinkel	293
16	<i>Making the Impossible Easy: Usable PKI</i> Dirk Balfanz, Glenn Durfee, and D. K. Smetters	319
17	<i>Simple Desktop Security with Chameleon</i> A. Chris Long and Courtney Moskowitz	335
18	<i>Security Administration Tools and Practices</i> Eser Kandoğan and Eben M. Haber	357
Part Four	PRIVACY AND ANONYMITY SYSTEMS	379
19	<i>Privacy Issues and Human-Computer Interaction</i> Mark S. Ackerman and Scott D. Mainwaring	381
20	<i>A User-Centric Privacy Space Framework</i> Benjamin Brunk	401
21	<i>Five Pitfalls in the Design for Privacy</i> Scott Lederer, Jason I. Hong, Anind K. Dey, and James A. Landay	421
22	<i>Privacy Policies and Privacy Preferences</i> Lorrie Faith Cranor	447
23	<i>Privacy Analysis for the Casual User with Bugnosis</i> David Martin	473
24	<i>Informed Consent by Design</i> Batya Friedman, Peyina Lin, and Jessica K. Miller	495
25	<i>Social Approaches to End-User Privacy Management</i> Jeremy Goecks and Elizabeth D. Mynatt	523
26	<i>Anonymity Loves Company: Usability and the Network Effect</i> Roger Dingleline and Nick Mathewson	547
Part Five	COMMERCIALIZING USABILITY: THE VENDOR PERSPECTIVE	561
27	<i>ZoneAlarm: Creating Usable Security Products for Consumers</i> Jordy Berson	563
28	<i>Firefox and the Worry-Free Web</i> Blake Ross	577
29	<i>Users and Trust: A Microsoft Case Study</i> Chris Nodder	589

30	<i>IBM Lotus Notes/Domino: Embedding Security in Collaborative Applications</i>	607
	<i>Mary Ellen Zurko</i>	
31	<i>Achieving Usable Security in Groove Virtual Office</i>	623
	<i>George Moromisato, Paul Boyd, and Nimisha Asthagiri</i>	
Part Six	THE CLASSICS	637
32	<i>Users Are Not the Enemy</i>	639
	<i>Anne Adams and M. Angela Sasse</i>	
33	<i>Usability and Privacy: A Study of KaZaA P2P File Sharing</i>	651
	<i>Nathaniel S. Good and Aaron Krekelberg</i>	
34	<i>Why Johnny Can't Encrypt</i>	669
	<i>Alma Whitten and J. D. Tygar</i>	
	<i>Index</i>	693
