Introduction	1
<i>Svetlana Vogeeler and Liliane Tasmowski</i>	
PART I. Non-definiteness, Plurality, and Incorporation	
The meaningful bounds of incorporation	35
<i>Greg Carlson</i>	
Bare nouns, number and types of incorporation	51
<i>Carmen Dobrovie-Sorin, Tonia Bleam and M. Teresa Espinal</i>	
The unmarked determiner	81
<i>Donka F. Farkas</i>	
Bare objects in Korean: (Pseudo-)incorporation and (in)definiteness	107
<i>Song-Nim Kwon and Anne Zribi-Hertz</i>	
Bare plurals in object position: Which verbs fail to give existential readings, and why?	133
<i>Sheila Glasbey</i>	
PART II. Alternatives to the Incorporation Approach: Relating Non-definiteness and Plurality to Aspect	
Aspectual implications of the semantics of plural indefinites	161
<i>Henriëtte de Swart</i>	
Indefinites, quantifiers and pluractionals: What scope effects tell us about event pluralities	191
<i>Brenda Laca</i>	
Generic sentences and bare plurals	219
<i>Jacqueline Guéron</i>	

PART III. Numerical Non-definites

Indefinite <i>time</i> phrases, <i>in situ</i> scope, and dual-perspective intensionality <i>Fred Landman</i>	237
Identity of the domain of quantification for numerals <i>Mana Kobuchi-Philip</i>	267
Scope shift with numeral indefinites: Syntax or processing? <i>Tanya Reinhart</i>	291
Take 'five': The meaning and use of a number word <i>Bart Geurts</i>	311
The semantics of par numerals <i>Francis Corblin</i>	331
