<b>1</b>	<b>Introduction to Composite Materials .....</b>	<b>1</b>
	Chapter Objectives.....	1
1.1	Introduction .....	1
1.2	Classification.....	16
	1.2.1 Polymer Matrix Composites.....	19
	1.2.2 Metal Matrix Composites .....	40
	1.2.3 Ceramic Matrix Composites.....	45
	1.2.4 Carbon–Carbon Composites .....	46
1.3	Recycling Fiber-Reinforced Composites .....	50
1.4	Mechanics Terminology .....	51
1.5	Summary .....	54
	Key Terms .....	54
	Exercise Set .....	55
	References.....	57
	General References .....	58
	Video References.....	59
<b>2</b>	<b>Macromechanical Analysis of a Lamina .....</b>	<b>61</b>
	Chapter Objectives.....	61
2.1	Introduction .....	61
2.2	Review of Definitions.....	65
	2.2.1 Stress.....	65
	2.2.2 Strain .....	68
	2.2.3 Elastic Moduli.....	75
	2.2.4 Strain Energy.....	77
2.3	Hooke’s Law for Different Types of Materials.....	79
	2.3.1 Anisotropic Material.....	81
	2.3.2 Monoclinic Material.....	82
	2.3.3 Orthotropic Material (Orthogonally Anisotropic)/Specially Orthotropic.....	84
	2.3.4 Transversely Isotropic Material .....	87
	2.3.5 Isotropic Material .....	88
2.4	Hooke’s Law for a Two-Dimensional Unidirectional Lamina.....	99
	2.4.1 Plane Stress Assumption.....	99
	2.4.2 Reduction of Hooke’s Law in Three Dimensions to Two Dimensions.....	100
	2.4.3 Relationship of Compliance and Stiffness Matrix to Engineering Elastic Constants of a Lamina.....	101
2.5	Hooke’s Law for a Two-Dimensional Angle Lamina.....	109

2.6	Engineering Constants of an Angle Lamina .....	121
2.7	Invariant Form of Stiffness and Compliance Matrices for an Angle Lamina .....	132
2.8	Strength Failure Theories of an Angle Lamina .....	137
2.8.1	Maximum Stress Failure Theory .....	139
2.8.2	Strength Ratio .....	143
2.8.3	Failure Envelopes .....	144
2.8.4	Maximum Strain Failure Theory .....	146
2.8.5	Tsai–Hill Failure Theory .....	149
2.8.6	Tsai–Wu Failure Theory .....	153
2.8.7	Comparison of Experimental Results with Failure Theories .....	158
2.9	Hygrothermal Stresses and Strains in a Lamina .....	160
2.9.1	Hygrothermal Stress–Strain Relationships for a Unidirectional Lamina .....	163
2.9.2	Hygrothermal Stress–Strain Relationships for an Angle Lamina .....	164
2.10	Summary .....	167
	Key Terms .....	167
	Exercise Set .....	168
	References .....	174
	Appendix A: Matrix Algebra .....	175
	Key Terms .....	195
	Appendix B: Transformation of Stresses and Strains .....	197
	B.1 Transformation of Stress .....	197
	B.2 Transformation of Strains .....	199
	Key Terms .....	202
<b>3</b>	<b>Micromechanical Analysis of a Lamina .....</b>	<b>203</b>
	Chapter Objectives .....	203
3.1	Introduction .....	203
3.2	Volume and Mass Fractions, Density, and Void Content .....	204
3.2.1	Volume Fractions .....	204
3.2.2	Mass Fractions .....	205
3.2.3	Density .....	207
3.2.4	Void Content .....	211
3.3	Evaluation of the Four Elastic Moduli .....	215
3.3.1	Strength of Materials Approach .....	216
3.3.1.1	Longitudinal Young’s Modulus .....	218
3.3.1.2	Transverse Young’s Modulus .....	221
3.3.1.3	Major Poisson’s Ratio .....	227
3.3.1.4	In-Plane Shear Modulus .....	229
3.3.2	Semi-Empirical Models .....	232
3.3.2.1	Longitudinal Young’s Modulus .....	234
3.3.2.2	Transverse Young’s Modulus .....	234

3.3.2.3	Major Poisson's Ratio.....	236
3.3.2.4	In-Plane Shear Modulus .....	237
3.3.3	Elasticity Approach.....	239
3.3.3.1	Longitudinal Young's Modulus.....	241
3.3.3.2	Major Poisson's Ratio.....	249
3.3.3.3	Transverse Young's Modulus.....	251
3.3.3.4	Axial Shear Modulus .....	256
3.3.4	Elastic Moduli of Lamina with Transversely Isotropic Fibers.....	268
3.4	Ultimate Strengths of a Unidirectional Lamina .....	271
3.4.1	Longitudinal Tensile Strength.....	271
3.4.2	Longitudinal Compressive Strength.....	277
3.4.3	Transverse Tensile Strength.....	284
3.4.4	Transverse Compressive Strength.....	289
3.4.5	In-Plane Shear Strength.....	291
3.5	Coefficients of Thermal Expansion.....	296
3.5.1	Longitudinal Thermal Expansion Coefficient .....	297
3.5.2	Transverse Thermal Expansion Coefficient .....	298
3.6	Coefficients of Moisture Expansion.....	303
3.7	Summary .....	307
	Key Terms .....	308
	Exercise Set .....	308
	References.....	311

## **4 Macromechanical Analysis of Laminates..... 315**

Chapter Objectives.....	315
4.1 Introduction .....	315
4.2 Laminate Code.....	316
4.3 Stress–Strain Relations for a Laminate .....	318
4.3.1 One–Dimensional Isotropic Beam Stress–Strain Relation .....	318
4.3.2 Strain-Displacement Equations.....	320
4.3.3 Strain and Stress in a Laminate.....	325
4.3.4 Force and Moment Resultants Related to Midplane Strains and Curvatures.....	326
4.4 In-Plane and Flexural Modulus of a Laminate .....	340
4.4.1 In-Plane Engineering Constants of a Laminate .....	341
4.4.2 Flexural Engineering Constants of a Laminate.....	344
4.5 Hygrothermal Effects in a Laminate .....	350
4.5.1 Hygrothermal Stresses and Strains .....	350
4.5.2 Coefficients of Thermal and Moisture Expansion of Laminates.....	358
4.5.3 Warpage of Laminates.....	362
4.6 Summary .....	363
Key Terms .....	364

Exercise Set .....	364
References.....	367
<b>5 Failure, Analysis, and Design of Laminates .....</b>	<b>369</b>
Chapter Objectives.....	369
5.1 Introduction.....	369
5.2 Special Cases of Laminates .....	370
5.2.1 Symmetric Laminates .....	370
5.2.2 Cross-Ply Laminates .....	371
5.2.3 Angle Ply Laminates .....	372
5.2.4 Antisymmetric Laminates.....	372
5.2.5 Balanced Laminate.....	373
5.2.6 Quasi-Isotropic Laminates.....	373
5.3 Failure Criterion for a Laminate .....	380
5.4 Design of a Laminated Composite .....	393
5.5 Other Mechanical Design Issues.....	419
5.5.1 Sandwich Composites .....	419
5.5.2 Long-Term Environmental Effects.....	420
5.5.3 Interlaminar Stresses.....	421
5.5.4 Impact Resistance.....	422
5.5.5 Fracture Resistance .....	423
5.5.6 Fatigue Resistance.....	424
5.6 Summary .....	425
Key Terms .....	426
Exercise Set .....	426
References.....	430
<b>6 Bending of Beams .....</b>	<b>431</b>
Chapter Objectives.....	431
6.1 Introduction.....	431
6.2 Symmetric Beams .....	433
6.3 Nonsymmetric Beams .....	444
6.4 Summary .....	455
Key Terms .....	455
Exercise Set .....	456
References.....	457
<b>Index .....</b>	<b>459</b>
