

Contents

	Preface	vii
	Notations	xi
CHAPTER I.	Hyperfunctions	3
§1.	Sheaf Theory	3
§2.	Hyperfunctions as Boundary Values of Holomorphic Functions	21
CHAPTER II.	Microfunctions	35
§1.	Definition of Microfunctions	35
§2.	Vanishing Theorems of Relative Cohomology Groups, Pure n -Codimensionality of \mathbf{R}^n with respect to $\mathcal{O}_{\mathbf{C}^n}$ etc.	51
§3.	Fundamental Exact Sequences	60
§4.	Examples	81
CHAPTER III.	Fundamental Operations	101
§1.	Product, Restriction, and Substitution	101
§2.	Integration	116
§3.	Analyticity of Feynman Integrals	131
§4.	Microlocal Operators and the Fundamental Theorem of Sato	135
§5.	The Wave Equation	145
§6.	Fundamental Solutions for Regularly Hyperbolic Operators	161
§7.	The Flabbiness of the Sheaf of Microfunctions	168
§8.	Appendix	179
CHAPTER IV.	Microdifferential Operators	191
§1.	Definition of the Microdifferential Operator and Its Fundamental Properties	191
§2.	Quantized Contact Transformation for Microdifferential Operators	216
§3.	Structures of Systems of Microdifferential Equations	228
	References	248
	Index	252
