

Contents

FOREWORD	v
PREFACE	vii
Splines in the Complex Plane	1
<i>J.H. Ahlberg</i> Brown University, Providence, Rhode Island	
Prolongement d'une Fonction en une Fonction Différentiable. Diverses Majorations sur le Prolongement	29
<i>Christian Coatmelec</i> Université de Rennes, Rennes, France	
Spline Interpolation near Discontinuities	51
<i>Michael Golomb</i> Purdue University, Lafayette, Indiana	
Generalized Spline Interpolation and Nonlinear Programming	75
<i>Klaus Ritter</i> Universität Karlsruhe, Karlsruhe, W. Germany	
Splines via Optimal Control	119
<i>O.L. Mangasarian</i> University of Wisconsin, Madison, Wisconsin <i>L.L. Schumaker</i> University of Texas, Austin, Texas	
On the Approximation by γ -Polynomials	157
<i>Carl de Boor</i> Purdue University, Lafayette, Indiana	

CONTENTS

Piecewise Bicubic Interpolation and Approximation in Polygons	185
<i>Garrett Birkhoff</i> Harvard University, Cambridge, Massachusetts	
Distributive Lattices and the Approximation of Multivariate Functions	223
<i>William J. Gordon</i> General Motors Research Laboratory, Warren, Michigan	
Multivariate Spline Functions and Elliptic Problems	279
<i>Martin H. Schultz</i> California Institute of Technology, Pasadena, California	
On the Degree of Convergence of Nonlinear Spline Approximation	349
<i>John R. Rice</i> Purdue University, Lafayette, Indiana	
Error Bounds for Spline Interpolation	367
<i>Richard S. Varga</i> Case Western Reserve University, Cleveland, Ohio	
Multipoint Expansions of Finite Differences,	389
<i>A. Meir and A. Sharma</i> University of Alberta, Edmonton, Canada	
One-Sided L_1 -Approximation by Splines of an Arbitrary Degree	405
<i>Zvi Ziegler</i> Technion, Haifa, Israel	
Construction of Spline Functions in a Convex Set	415
<i>P.J. Laurent</i> Université de Grenoble, Grenoble, France	
Best Quadrature Formulas and Interpolation by Splines Satisfying Boundary Conditions	447
<i>Samuel Karlin</i> Stanford University, Stanford, California	

CONTENTS

The Fundamental Theorem of Algebra for Monosplines Satisfying Certain Boundary Conditions and Applica- tions to Optimal Quadrature Formulas	467
<i>Samuel Karlin</i> Stanford University, Stanford, California	
INDEX	485
