Preface

S. S. Antman and H. Brezis

THE EXISTENCE OF ORIENTATION-PRESERVING DEFORMATIONS IN NONLINEAR ELASTICITY

1	Introduction	1
2	Boundary Value Problem for the Planar Deformation of Rods	3
3	Direct Methods of the Calculus of Variations for Conservative Problems	9
4	Monotone Operator Methods for Nonconservative Problems	22
5	Conclusion	27
	References	28

J. E. Marsden and T. J. R. Hughes

TOPICS IN THE MATHEMATICAL FOUNDATIONS OF ELASTICITY

	Introduction	30
1	Kinematics	33
2	Balance Laws	46
3	Constitutive Theory	66
4	Linearization	98
5	Semigroup Theory	121
6	Linear Hamiltonian Systems	157
7	Existence and Uniqueness for Linear Elastodynamics	172
	Appendix (by C. Navarro): Existence and Uniqueness in the Cauchy Problem for a Linear Thermoelastic Material with Memory	191
8	Linear and Local Nonlinear Elastostatics	204
9	Dynamical Systems and Hamiltonian Structures	214

10	The Hamiltonian Structure of Nonlinear Elastodynamics	241
11	A Survey of Selected Nonlinear Problems	252
	References	269
