CONTENTS

Foreword..... vii

Chapter 0. PRELIMINARY RESULTS 1

0.1 Functions on locally compact spaces..... 1
0.2 Whitney's theorems..... 5
0.3 Multilinear mappings and polynomials..... 8
0.4 Polynomials algebras..... 11
0.5 ε-product and the approximation property..... 12
0.6 Angelic spaces 14
0.7 Absolutely summing operators..... 15
0.8 Realcompact spaces..... 16
0.9 Holomorphic functions..... 17
0.10 Weakly compactly generated spaces..... 17
0.11 Injective spaces..... 18
0.12 Some additional theorems..... 18

Chapter 1. APPROXIMATION OF SMOOTH FUNCTIONS ON MANIFOLDS.... 23

1.1 Weierstrass' theorem..... 23
1.2 Nachbin's theorem..... 26
1.3 m-admissible algebras..... 29
1.4 Nachbin m-algebras..... 36
1.5 Modules on strongly separating algebras..... 38
1.6 Dense polynomial algebras..... 42
1.7 Pointwise description of closures..... 44
1.8 Notes, remarks and references..... 48

Chapter 2. SIMULTANEOUS APPROXIMATION OF SMOOTH FUNCTIONS..... 53

2.1 Approximation for the fine topology of order m..... 53
2.2 A nonlinear characterization of superreflexive Banach spaces..... 57
2.3 Notes and remarks..... 62

Chapter 3. POLYNOMIAL APPROXIMATION OF DIFFERENTIABLE FUNCTIONS. 65

3.0 Introduction 65
3.1 Approximation for the compact-compact topology of order m. Basic density properties..... 66
3.2 Quasi-differentiable functions on Banach spaces. Basic topological properties..... 69
3.3 On completion of $(P_f(E;F); \tau_c^m)$..... 76
3.4 Notes and references..... 77

Chapter 4. WEAKLY CONTINUOUS FUNCTIONS ON BANACH SPACES..... 79

4.1 Introduction. Preliminary Definitions. Elementary Properties..... 79
4.2 The bw and bw* topologies..... 82
4.3 Weakly continuous and weakly uniformly continuous functions on bounded sets..... 86
4.4 On completion of spaces of weakly continuous functions..... 93
4.5 Polynomial case..... 97
4.6 Composition of weakly uniformly continuous functions 105
4.7 Notes and references..... 112

Chapter 5. APPROXIMATION OF WEAKLY UNIFORMLY DIFFERENTIABLE FUNCTIONS..... 115

5.1 Introduction..... 115
5.2 Uniformly differentiable functions on bounded sets. 116
5.3 Extension of Bernstein's theorem to infinite dimensional Banach spaces..... 120
5.4 Notes and references 125

Chapter 6. APPROXIMATION FOR THE COMPACT-OPEN TOPOLOGY.... 127

6.1 Extension of Weierstrass' theorem for infinite dimensional Banach spaces..... 127

6.2 References..... 132

Chapter 7. APPROXIMATION OF WEAKLY DIFFERENTIABLE FUNCTIONS 133

7.1 Weakly differentiable functions. Some results on weak compactness. Locally convex structure..... 133

7.2 The bounded weak approximation property..... 141

7.3 Polynomial approximation of weakly differentiable functions..... 144

7.4 Notes, remarks and references..... 146

Chapter 8. SPACES OF DIFFERENTIABLE FUNCTIONS AND THE APPROXIMATION PROPERTY..... 151

8.1 ε-products of continuously differentiable func_ tion spaces. Applications..... 151

8.2 On the approximation property in spaces of continuously differentiable functions..... 155

8.3 Notes and references 159

Chapter 9 POLYNOMIAL ALGEBRAS OF CONTINUOUSLY DIFFERENTIABLE FUNCTIONS..... 161

9.1 Polynomial algebras. Extension of Nachbin's theorem to infinite dimensioneal Banach spaces..... 162

9.2 Notes,remarks and references..... 166

Chapter 10 ON THE CLOSURE OF MODULES OF CONTINUOUSLY DIFFERENTIABLE FUNCTIONS..... 169

10.1 Extension of Whitney's ideal theorem to infinite dimensional Banach spaces..... 169

10.2 Notes and references..... 176

Chapter 11 HOMOMORPHISMS BETWEEN ALGEBRAS OF UNIFORMLY WEAKLY DIFFERENTIABLE FUNCTIONS..... 177

11.1 Representations of uniformly weakly differentiable functions..... 178

11.2 Homomorphisms between algebras of uniformly weakly differentiable functions..... 182
11.3 Examples..... 188
11.4 Notes, remarks and references..... 193

Chapter 12 THE PALEY-WIENER -SCHWARTZ THEOREM IN INFINITE DIMENSION..... 195

12.1 The Fourier transform of distributions with bounded support in infinite dimensions..... 196
12.2 Characterization of the Fourier transform of distributions with bounded support in infinite dimensions..... 203
12.3 Notes , remarks and references..... 206

Appendix I. WHITNEY'S SPECTRAL THEOREM 209
