

## Contents

### Part I. Mathematical Theory of the Padé Approximants Method.

BACKER, G.A. : The Linear Functional Equation Approach to the Problem of the Convergence of Padé Approximants . . . . .	3
BESSIS, D. : Construction of Variational Bounds for the N - Body Eigenstate Problem by the Method of Padé Approximations . . . . .	17
CHISHOLM, J. S.R. : Rational Polynomial Approximants in N variables . . .	33
GRAVES - MORRIS, P.R. : Convergence of Rows of the Padé Table . . . . .	55
WUYTACK, L. : The Use of Padé Approximation in Numerical Integration. . .	69

### Part II. Applications of Padé Approximants Method to Problems of Fluid Mechanics

BAUSSET, M. : Determination of Shock Waves by Convergence Acceleration. .	81
CHENG, H.K. and HAFEZ, M.M. : Cyclic Iterative Method Applied to Transonic Flow Analyses . . . . .	101
DALE MARTIN, E. : A Technique for Accelerating Iterative Convergence in Numerical Integration, with Application in Transonic Aerodynamics. .	123
GAMMEL, J.L. : The Rise of a Bubble in a Fluid. . . . .	141
SCHWARTZ, L.W. : Rational Approximations to the Solution of the Blunt-Body and Related Problems . . . . .	165
TURCHETTI, G. and MAINARDI, F. : Wave Front Expansions and Padé Approximants for Transient Waves in Linear Dispersive Media . . . . .	189
VAN TUYL, A.H. : Application of Methods for Acceleration of Convergence to the Calculation of Singularities of Transonic Flows. . .	209
VAN TUYL, A.H. : The Use of Padé Fractions in the Calculation of Nozzle Flows. . . . .	225

### Part III. General Bibliography

BREZINSKI, C. : A Bibliography of Padé Approximation and some Related Matters . . . . .	245
