

CONTENTS

<i>Chapter I. VARIOUS METHODS OF INTERPOLATION</i>	
1. The Problem	7
2. The LAGRANGE Formula	8
3. A Rearrangement of the LAGRANGE Formula — NEWTON's Formula	11
4. Interpolation with Multiple Nodes	15
5. Trigonometric Interpolation	18
<i>Chapter II. THEOREMS OF NEGATIVE CHARACTER</i>	
1. The Theorems of S. N. BERNSTEIN and G. FABER	23
2. The BERNSTEIN Example	30
3. An Example Due to MARCINKIEWICZ	35
<i>Chapter III. THE CONVERGENCE OF INTERPOLATION PROCESSES</i>	
1. The Role of the Function $\lambda_n(x)$	47
2. The Theorems of GRÜNWARD and TURÁN	51
3. Convergence in Mean	55
4. The FEJÉR Interpolation Process	57
5. Generalization of the Preceding Results	59
6. Normal Matrices	62
<i>Chapter IV. SEVERAL CONVERGENCE PROCESSES RELATED TO INTERPOLATION</i>	
1. The First BERNSTEIN Procedure	68
2. The Second BERNSTEIN Procedure	72
3. A Theorem of S. M. LOSINSKI and the Method of S. J. RAPPOPORT	76
4. The Third BERNSTEIN Procedure	79
5. Certain General Properties of Summation Formulas	86

<i>Chapter V. APPROXIMATION QUADRATURES</i>	
1. The Problem	93
2. The Remainder in the Quadrature Formula	97
3. Quadratures of Gaussian Type	102
4. Special Quadratures of Gaussian Type	108
<i>Chapter VI. SUPPLEMENT TO THE THEORY OF APPROXIMATION QUADRATURES</i>	
1. The General Quadrature Process and its Convergence	117
2. Quadratures with Positive Coefficients	125
3. A Theorem Due to R. O. KUSMIN	129
4. The TCHEBYSHEFF Problem and a BERNSTEIN Theorem	136
5. The POSSE Theorem	150
<i>Appendix 1. STIRLING'S FORMULA</i>	156
<i>Appendix 2. ON THE MÜNTZ THEOREMS</i>	160
<i>Appendix 3. THE THEOREMS OF S. M. LOSINSKI—F. I. KHARSHILADZE AND V. F. NIKOLAEV</i>	164
<i>Bibliography</i>	170
<i>Index</i>	175
<i>Index of Symbols</i>	176
