

CONTENTS

Preface	v
Chapter 1 TRIGONOMETRIC SUMS	1
1.1 Preliminaries	1
1.2 Trigonometric Polynomials	9
1.3 Sine and Cosine Series with Monotone Coefficients	17
1.4 Comments	23
Exercises	27
Chapter 2 INTEGRABILITY OF TRIGONOMETRIC SUMS	31
2.1 Shortcomings of the Riemann Integral	31
2.2 Lebesgue Measure and Integration	36
2.3 L_p Spaces	76
2.4 Some Integration Theorems	102
2.5 Comments	107
Exercises	111
Chapter 3 CONVERGENCE AND CESARO SUMMABILITY OF FOURIER SERIES	116
3.1 Basic Properties of Fourier Coefficients	116
3.2 Partial Sums and Their Rate of Growth	132
3.3 Convergence of Fourier Series	135
3.4 Cesaro Summability	145

3.5	o -Estimates of Partial Sums	152
3.6	Comments	157
	Exercises	167
Chapter 4 CONVERGENCE AND SUMMABILITY OF TRIGONOMETRIC SERIES		176
4.1	Uniform Convergence and Gibbs' Phenomenon	176
4.2	Absolute Convergence	183
4.3	Abel Summability and the Poisson Integral	191
4.4	The Fourier Character of Trigonometric Series	197
4.5	Comments	214
	Exercises	220
Chapter 5 MULTIPLE FOURIER SERIES		223
5.1	Formal Expansions	223
5.2	Convergence of Double Series	229
5.3	Fourier Expansion of L^2 Functions	231
5.4	Absolute and Uniform Convergence of Fourier Series	237
5.5	Convergence of Double Fourier Series	240
5.6	Comments	242
	Exercises	244
Chapter 6 FOURIER TRANSFORM AND APPLICATIONS		246
6.1	Fourier Transform for L^1	246
6.2	Cesaro Summability and Uniqueness and Inversion	252
6.3	The Plancherel Theorem	257
6.4	Comments	261
	Exercises	262
Chapter 7 DISTRIBUTIONS		265
7.1	Distributions and $C^\infty[0, 2\pi]$	265
7.2	Characterizations of $C^\infty[0, 2\pi]$ and $\mathcal{D}'(0, 2\pi)$	271
7.3	Fourier Series of Distributions	274

7.4	Fourier Transforms of Generalized Functions	278
7.5	Comments	281
	Exercises	282
Chapter 8 ORTHOGONAL SYSTEMS		285
8.1	The Gamma Function	285
8.2	The Beta Function	288
8.3	Euler-Maclaurin Sum Formula and Asymptotic Expansion of $\Gamma(n)$	291
8.4	Hypergeometric Series	294
8.5	Sturm-Liouville Theory	296
8.6	Eigenvalues and Orthogonality Relations	298
8.7	Orthogonal Polynomials	301
8.8	Legendre and Chebyshev Polynomials	316
8.9	Orthogonal Series	323
8.10	Legendre's Differential Equation	325
8.11	Series Solution of Legendre's Differential Equation	328
8.12	The Generating Function for Legendre Polynomials	331
8.13	Laplace's Integral and Bounds for P_n	333
8.14	Legendre's Function of the Second Kind	335
8.15	Convergence of Fourier-Legendre Series	337
8.16	Chebyshev Polynomials	341
8.17	Appell Polynomials	346
8.18	Comments	348
	Exercises	354
Chapter 9 BESSEL FUNCTIONS		360
9.1	Bessel's Differential Equation	360
9.2	Series Solution of Bessel's Equation	362
9.3	Bessel Functions of the Second Kind	366
9.4	Analytic Character of Bessel Functions	369
9.5	Recurrence Formulas	369
9.6	The Generating Function for J_n	372

9.7	Poisson's Integral	374
9.8	The Modified Bessel Function of the First Kind	378
9.9	Zeros of Bessel Functions: Part I	380
9.10	Orthogonal Properties	387
9.11	Zeros of Bessel Functions: Part II	388
9.12	Fourier-Bessel Series of the First Kind	390
9.13	Bessel's Inequality	394
9.14	Fourier-Bessel Series of the Second Kind	396
9.15	Comments	399
	Exercises	404
	References	407
	Index	413
