CONTENTS

Table of Contents

1. Introduction 1

1.1 Motivation 1
1.2 Objectives 2
1.3 Contribution of this Thesis 3
1.4 Outline 3

2. System Overview 7

2.1 UMTS 7
2.1.1 General Overview 10
2.1.2 Synchronization & Cell Search 13
2.1.3 Scanning of Complementary Systems & Compressed Mode 19
2.1.4 Measurements in UMTS 23
2.1.5 Measurement Reports 28
2.2 IEEE 802.11 30
2.2.1 General Overview 30
2.2.2 Synchronization & Cell Search 37
2.2.3 Scanning Procedures in WLAN 802.11 39
2.2.4 Measurements in 802.11 44
2.2.5 Specific Measurements in 802.11h 50

3. Integration & Cooperation of Radio Access Networks . 57

3.1 Introduction 57
3.2 State of the Art Overview 59
3.2.1 Standardization Bodies & Fora 59
3.2.2 Research Projects 66
3.2.3 Comparison of Integration Efforts 72
3.3 Mobility & Handover 76
3.3.1 General Aspects of Mobility 78
3.3.2 Handover Aspects 81
3.4 Trigger 94

3.4.1 Definition & Classification 95
3.4.2 Decision Criteria 96

4. Localization Techniques & Principles 101

4.1 Localization & Positioning 102
4.1.1 Localization – What for? 102
4.1.2 Location Based Services 103
4.2 Basic Localization Principles 110
4.2.1 Classification of Localization Techniques 112
4.2.2 Physical & Symbolic Localization 114
4.2.3 Absolute & Relative Localization 115
4.2.4 Self- & Remote Localization 115
4.3 Cellular Localization 116
4.3.1 Cell Id 116
4.3.2 Signal Strength 118
4.3.3 Time-based Algorithms 119
4.3.4 Angle of Arrival 124
4.3.5 Database Correlation/ Fingerprints/ Pattern Recognition 124
4.3.6 Hybrid Methods 125
4.4 Satellite Localization 126
4.4.1 Global Positioning System 127
4.4.2 GLONASS 133
4.4.3 Galileo 133
4.5 Accuracy & Precision 134
4.6 Summary 137

5. Hybrid Information System 139

5.1 Motivation 140
5.2 Basic Principle 140
5.3 Overview 141
5.3.1 Feeding & Information Clients 141
5.3.2 Localization Units 142
5.3.3 Service Control & Data Administration Units 143
5.3.4 Passive & active operation 145
5.4 Data Administration 146
5.4.1 Feeding of the Hybrid Information System 146
5.4.2 Internal Data Processing 146
5.4.3 Data Supply 150
5.4.4 Self-Healing property 150
5.5 Application Areas 151
5.5.1 Handover triggering 151
5.5.2 Network/Coverage optimization 151

5.5.3 Link Adaptation & Power Control 152
5.5.4 Adaptive Beaconing 152
5.6 Realization Aspects: Mapping to 3/4G Architectures 153
5.6.1 Location Services Architecture of 3GPP 153
5.6.2 WLAN/3GPP Interworking Architecture 163
5.6.3 WINNER Logical Node Architecture 165
5.6.4 Summary 168

6. Performance Analysis 171

6.1 Localization Aspects 172
6.1.1 Modeling of Localization Imprecision 172
6.1.2 Evaluation Criterion 174
6.2 Correlation Analysis 176
6.2.1 Normal Distribution with cut-off 178
6.3 Virtual Coverage 182
6.4 Beacon Protection 185

7. Integrated Simulation Environment 191

7.1 Overview 191
7.2 S-WARP 193
7.2.1 General Overview 194
7.2.2 Specific Changes 194
7.3 URIS 196
7.3.1 General Overview 197
7.3.2 URIS Modifications 198
7.4 S-GOOSE/RISE 199
7.5 Extended HIS 200
7.5.1 HIS 201
7.5.2 HO Manager 202
7.6 Simulator Integration & Modeling 207
7.6.1 Module Loader 207
7.6.2 Combined Statistical Evaluation 208
7.7 Simulator Validation 209
7.7.1 Queue Transfer 209
7.7.2 RPI Measurements 215

8. Performance Evaluation 221

8.1 Services & Scenarios 222
8.2 Detrimental Scanning Impact 223
8.2.1 WLAN: System Detection 224

8.2.2 UMTS: Impact of Compressed Mode 227
8.3 Enhanced Coverage Detection 236
8.3.1 Coverage Detection 236
8.3.2 CoG Trigger Performance 247
8.4 Context Provisioning 252
8.4.1 Recommendation of initial PHY-Mode 252
8.4.2 Capacity Exploitation 258
8.5 Adaptive Beacon Control 262
8.5.1 Control of Beacon Interval 262
8.5.2 Directed Beaconing 272

9. Summary & Outlook 281

A. HIS: Further Application Areas and Related Work 285

A.1 Measuring of non-accessible areas 285
A.2 ABC Support 286
A.3 Radio Resource Management & Connection Admission Control 286
A.4 Positioning Support 287
A.5 Location Aware Networking 288
A.6 Navigation Support 289
A.7 Related Work 289

B. Geodetic Fundamentals 293

B.1 Introduction 293
B.2 World Geodetic System 1984 297
B.3 Universal Transverse Mercator 298
B.4 Gauss-Krueger Coordinate System 300

C. Specific Measurements in 802.11k 303

C.1 Channel Load Report 307
C.2 Noise Histogram Report 308
C.3 Beacon Report 308
C.4 Frame Report 310
C.5 Hidden Station Report 311
C.6 Medium Sensing Time Histogram Report 312
C.7 STA Statistics Report 314
C.8 LCI Report 316
C.9 Measurement Pause Request 317
