

# CONTENTS

<b>General Introduction</b>	1
<b>Chapter I.</b>	
The Method of Indicators	
I.1. Introduction	9
I.2. The Method of Indicators	11
I.3. Graph-Sieves	29
<b>Chapter II.</b>	
The Method of Polynomials	
II.1. The Presentation of the Method	47
II.2. Application of the Method of Polynomials	53
II.3. Iteration Techniques	63
<b>Chapter III.</b>	
The Geometric Method	
III.1. Introduction	73
III.2. Geometric Method: Part I	76
III.3. Geometric Method: Part II	82
III.4. Characterization of Majorants and Minorants	88
<b>Chapter IV.</b>	
The Linear Programming Method	
IV.1. Results from the Theory of Linear Programming	101
IV.2. Applications to Bonferroni-Type Inequalities	108

**Chapter V.**

Multivariate Bonferroni-Type Inequalities	
V.1. Introduction and Notation	121
V.2. Multivariate Inequalities Which Are in Fact Univariate	123
V.3. The Multivariate Method of Polynomials	125
V.4. Further Multivariate Inequalities	129

**Chapter VI.**

Classical Problems of Probability and Applications in Combinatorics	
VI.1. Limit Theorems	137
VI.2. Applications to Urn Models	142
VI.3. Random Subset Selections	147
VI.4. Random Graphs	154

**Chapter VII.**

Applications in Number Theory	
VII.1. Introduction	161
VII.2. The Classical Method of Inclusion and Exclusion	163
VII.3. The Poisson Process and Prime Divisors	168
VII.4. Brun's Method and the Twin-Prime Problem	173
VII.5. A Metric Result for Series Representation of Real Numbers	175
VII.6. Continued Fractions	179

**Chapter VIII.**

Statistical Applications	
VIII.1. Estimation of the Power of Confidence Intervals	183
VIII.2. Bounds on Multivariate Distributions by Means of Marginals and Miscellaneous Applications	197

**Chapter IX.**

Extreme Value Theory	
IX.1. Formulation of the Problem and Some Specific Models	207
IX.2. The Classical Theory	210
IX.3. Independent but Not Identically Distributed Variables	217
IX.4. Limit Results for Dependent Models	219
IX.5. Multivariate Extremes	225

**Chapter X.**

Miscellaneous Topics	
X.1. Infinite Sequences of Events: Inversion Formulas	229
X.2. Quadratic Inequalities	235

X.3. Borel-Cantelli Lemmas	241
X.4. Miscellaneous Applications	245
<b>Bibliography</b>	<b>251</b>
<b>Index</b>	<b>265</b>
