

Contents

<i>Chapter 1. Operations on Series</i>	1
1. Associativity of Convergent Series	1
2. Commutativity of Absolutely Convergent Series	5
3. Riemann's Theorem	7
4. Multiplication of Series	13
5. Toeplitz's Theorem	21
6. The Theorems of Mertens and Abel	26
<i>Chapter 2. Iterated and Double Series</i>	30
7. Iterated Series	30
8. Double Series	35
9. Examples	43
10. Power Series in Two Variables	54
<i>Chapter 3. Computations Involving Series</i>	61
11. General Remarks	61
12. Examples	63
13. Euler's Transformation	70
14. The Transformations of Kummer and Markov	78
<i>Chapter 4. Summation of Divergent Series</i>	87
15. Introduction	87
16. The Method of Power Series	90
17. The Method of Arithmetic Means	98
18. Application of Generalized Summation to Multiplication of Series	110
19. Other Methods of Generalized Summation	113
20. The Methods of Borel and Euler	121
