

Contents

<i>Chapter 1. Uniform Convergence</i>	1
1. Introductory Remarks	1
2. Uniform and Nonuniform Convergence	4
3. Tests for Uniform Convergence	12
<i>Chapter 2. Functional Properties of the Sum of a Series</i>	20
4. Continuity of the Sum of a Series	20
5. Integration and Differentiation of a Series	32
6. The Case of Power Series	43
<i>Chapter 3. Applications</i>	56
7. More on Integration of Series	56
8. More on Differentiation of Series	69
9. The Implicit Function Theorem	79
10. Analytic Definition of the Trigonometric Functions	83
11. A Continuous Nondifferentiable Function	88
<i>Chapter 4. More on Power Series</i>	92
12. Operations on Power Series	92
13. Substitution of One Power Series into Another	97
14. Division of Power Series	109
15. Solution of Equations by Using Power Series	120
16. Lagrange's Series	128
<i>Chapter 5. Enveloping and Asymptotic Series</i>	135
17. Definitions and Examples	135
18. Basic Properties of Asymptotic Expansions	143
19. The Euler-Maclaurin Formula	148
20. Another Form of the Euler-Maclaurin Formula	160
<i>Index</i>	167
