

# Contents

<b>Chapter 1. The Space of Continuous Functions</b> .....	1
1. Subsets of $\mathbb{R}^k$ .....	1
2. The Space of Continuous Functions .....	6
3. Lattice Properties of the Space of Real Continuous Functions ....	14
<b>Chapter 2. Theorems of Korovkin and Stone-Weierstrass</b> .....	21
4. Theorems of Korovkin and Weierstrass .....	21
5. The Stone-Weierstrass Theorem .....	27
6. The Complex Stone-Weierstrass Theorem .....	36
<b>Chapter 3. Fourier Series of Continuous Functions</b> .....	39
7. Trigonometric Polynomials .....	39
8. Fourier Series .....	46
9. Fejér's Theorem on Uniform Convergence of Cesaro Means .....	52
10. Fourier Coefficients and Orders of Magnitude .....	56
<b>Chapter 4. Integration and Differentiation</b> .....	65
11. Measure .....	65
12. Integral .....	76
13. Product Integral, Fubini's Theorem and Convolution .....	90
14. Differentiation of the Integral .....	98
15. Measurability, Continuity and Differentiability .....	107
<b>Chapter 5. Spaces <math>L_p</math> and Convolutions</b> .....	111
16. Hölder's Inequality .....	111
17. Spaces $L_p$ .....	115
18. Convolution .....	128
19. Convolution and Approximate Identities .....	132

<b>Chapter 6. Fourier Series of Summable Functions</b> .....	137
20. Fourier Coefficients and the Fourier Transform .....	137
21. Pointwise Convergence of Cesaro Means and Abel Means .....	142
22. Pointwise Convergence of Fourier Series .....	148
23. Hilbert Space and the Space $L_2$ .....	160
<b>Chapter 7. Fourier Integral</b> .....	171
24. Some Useful Integrals .....	171
25. Inverse Fourier Transform .....	176
26. Convergence of the Inverse Fourier Transform .....	178
27. The Plancherel Theorem .....	188
<b>Chapter 8. Additional Results</b> .....	197
28. The Wilbraham-Gibbs Phenomenon .....	197
29. Absolute Convergence .....	199
30. Positive Definite Functions .....	202
31. Equidistribution of Sequences .....	206
32. Functions of Analytic Type .....	208
33. The Hausdorff-Young Theorem .....	214
34. The Poisson Sum Formula .....	224
35. The Heat Equation .....	228
36. More on the Heat Equation .....	234
37. The Wave Equation .....	242
<b>References</b> .....	247
<b>Subject Index</b> .....	249
