Contents

Preface

Preface	vii
Chapter 1 Fourier Coefficients and Fourier Series	1
1.1 Introduction	1
1.2 FC-functions and their Fourier coefficients	3
1.3 Completeness	12
1.4 Mean-square approximation	18
1.5 Convolution	22
Exercises	27
Chapter 2 Convergence Theory	29
2.1 Pointwise convergence	29
2.2 Uniform convergence	35
2.3 Behaviour near discontinuities	37
2.4 Piecewise monotone functions	41
2.5 Divergence of Fourier series	49
Exercises	51
Chapter 3 The Dirichlet Problem and the Poisson Integral	53
3.1 Harmonic functions	53
3.2 The Dirichlet problem and the Poisson integral	56
3.3 Applications to Fourier series	63
3.4 Harmonic conjugates	66
3.5 The Dirichlet problem in some other regions	71
3.6 Some applications of harmonic functions	79
Exercises	85
Chapter 4 Conjugate Functions and Conjugate Series	89
4.1 Conjugate series	89
4.2 Properties of the conjugate function	96
Exercises	99

1	The F Summ Squar The I transfe Some reises er 6 FC- ar series Conve Multip reises lix A Conti Integr Unifo Doub	The Fourier Summability Square-integrated The Dirichle transform Some applications of the English of the Englis	The Fourier integra Summability and in Square-integrable fur The Dirichlet problem of transform Some applications of training the series	The Fourier integral Summability and inversion Square-integrable function The Dirichlet problem in transform Some applications of the Freises For 6 Multiple Fourier Ser FC- and FV-functions of seseries Convergence of multiple F Multiple Fourier integrals reises Lix A Some Results from Continuity and differentia Integration Uniform convergence Double series and integral	The Fourier integral Summability and inversion of the Square-integrable functions The Dirichlet problem in the utransform Some applications of the Fourier croises FC- and FV-functions of several series Convergence of multiple Fourier Multiple Fourier integrals rcises Lix A Some Results from Elen Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the F Square-integrable functions The Dirichlet problem in the upper transform Some applications of the Fourier in reises FC 6 Multiple Fourier Series and In FC- and FV-functions of several varies series Convergence of multiple Fourier se Multiple Fourier integrals reises Lix A Some Results from Element Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourier Square-integrable functions The Dirichlet problem in the upper of transform Some applications of the Fourier integrates FC- and FV-functions of several variables series Convergence of multiple Fourier series Multiple Fourier integrals The Some Results from Elementary Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourie Square-integrable functions The Dirichlet problem in the upper half transform Some applications of the Fourier integra reises Per 6 Multiple Fourier Series and Integra FC- and FV-functions of several variables: series Convergence of multiple Fourier series Multiple Fourier integrals reises Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourier in Square-integrable functions The Dirichlet problem in the upper half-pletransform Some applications of the Fourier integral reises FC- and FV-functions of several variables: Fourier series Convergence of multiple Fourier series Multiple Fourier integrals The fourie	The Fourier integral Summability and inversion of the Fourier inte Square-integrable functions The Dirichlet problem in the upper half-plan transform Some applications of the Fourier integral reises Per 6 Multiple Fourier Series and Integrals FC- and FV-functions of several variables: Four series Convergence of multiple Fourier series Multiple Fourier integrals reises Multiple Fourier integrals reises Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourier integral Square-integrable functions The Dirichlet problem in the upper half-plane, a transform Some applications of the Fourier integral reises Per 6 Multiple Fourier Series and Integrals FC- and FV-functions of several variables: Fourier series Convergence of multiple Fourier series Multiple Fourier integrals reises Mix A Some Results from Elementary Analysis Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourier integral Square-integrable functions The Dirichlet problem in the upper half-plane, and transform Some applications of the Fourier integral reises FC- and FV-functions of several variables: Fourier coeseries Convergence of multiple Fourier series Multiple Fourier integrals reises Lix A Some Results from Elementary Analysis Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourier integral Square-integrable functions The Dirichlet problem in the upper half-plane, and the transform Some applications of the Fourier integral reises Per 6 Multiple Fourier Series and Integrals FC- and FV-functions of several variables: Fourier coefficiency series Convergence of multiple Fourier series Multiple Fourier integrals reises Continuity and differentiation Integration Uniform convergence Double series and integrals	The Fourier integral Summability and inversion of the Fourier integral Square-integrable functions The Dirichlet problem in the upper half-plane, and the transform Some applications of the Fourier integral reises FC- and FV-functions of several variables: Fourier coefficients series Convergence of multiple Fourier series Multiple Fourier integrals reises Lix A Some Results from Elementary Analysis Continuity and differentiation Integration Uniform convergence Double series and integrals	Introduction The Fourier integral Summability and inversion of the Fourier integral Square-integrable functions The Dirichlet problem in the upper half-plane, and the Hiltransform Some applications of the Fourier integral reises Problem of Multiple Fourier Series and Integrals FC- and FV-functions of several variables: Fourier coefficients series Convergence of multiple Fourier series Multiple Fourier integrals reises Continuity and differentiation Integration Uniform convergence Double series and integrals Lix B Some Definite Integrals
