<b>INTRODUCTION</b>	<b>ix</b>
<b>1 ON APPROXIMATIONS</b>	<b>1</b>
1.1 Introduction	1
1.2 Approximation to a cosine function	1
1.3 Periodic functions	6
1.4 The claim	6
1.5 A few examples showing the build-up	8
<b>2 FINDING THE FOURIER SERIES</b>	<b>15</b>
2.1 Derivation of the coefficients	15
2.2 Symmetry considerations	19
2.3 A few worked examples	22
2.4 How to sum up a series: a spin-off	27
2.5 Differentiation and integration	29
2.6 The coefficients for arbitrary period	31
2.7 The Fourier series as optimum approximation	37
2.8 Full-range, half-range, quarter-range, etc.	38
2.9 Exponential form	49
2.10 Parseval's theorem	53
2.11 Filters	54
EXERCISES	59
<b>3 FORCED SOLUTIONS OF ORDINARY DIFFERENTIAL EQUATIONS WITH PERIODIC EXCITATION</b>	<b>62</b>
3.1 Introduction	62
3.2 First-order differential equations	63
3.3 Second-order differential equations	64
3.4 Higher-order differential equations	65
3.5 Examples from electrical engineering	67
3.6 Solution of a non-linear differential equation	74
EXERCISES	76
<b>4 PARTIAL DIFFERENTIAL EQUATIONS</b>	<b>79</b>
4.1 Introduction	79
4.2 The vibrating string	80

4.3 Heat conduction	97
4.4 Transmission lines	104
EXERCISES	111
APPENDIX: The Gibbs phenomenon	114
INDEX	119
