Contents

1. Introduction 1

2. Darboux Transformations and Linear Equations 7
2.1 Darboux and Crum Theorems 7
2.2 Reflectionless Potentials and Their Properties 10
2.3 Darboux Transformations for the Linear Nonstationary Schrödinger Equation and Higher Order Linear Evolution Equations 16
2.4 Binary Darboux Transformations 19
2.5 Darboux Transformations for a Lattice Evolution Equation .. 23
2.6 Darboux Transformations and Supersymmetric Quantum Mechanics 24
2.7 Factorization Method for Multidimensional Hamiltonians ... 26
2.8 Binary Darboux Transformation and the $\partial_p \partial_q \psi + u\psi = 0$ Equation 27

3. Exact Solutions of the KdV and KP Equations 29
3.1 The KdV and KP Equations in Physics 29
3.2 The KdV Equation and the Associated Linear System 31
3.3 Some Exact Solutions of the KP Equation 33
3.4 Elastic and Inelastic Collisions of KP Solitons. Instability of Lumps 38
3.5 Soliton Propagation on an Arbitrary Background 41
3.6 The Boussinesq Equation 43
3.7 The Johnson Equation and its Equivalence to the KP Equation 45
3.8 The Cylindrical KdV Equation and its Exact Solutions 47

4. Darboux Transformations for the Zero Curvature Equations and Nonlocal Nonlinear Evolution Equations 49
4.1 Darboux Transformations for Nonlinear Evolution Equations and the Generalized Zakharov-Shabat Linear Problem 49
4.2 Multisoliton and Periodic Solutions of the Nonlinear Schrödinger Equation 51
4.3 Interactions of the NS Solitons with an Arbitrary Background 55
4.4 Bloch Equations, the Reduced Maxwell-Bloch System and SIT Equations 59

4.5 Generation of the Second Harmonic 67
4.6 The Nonlocal KdV Equation 68
4.7 The Kaup Equation 75

5. Nonlinear Lattice Equations and Related Systems 77
5.1 Darboux Transformations and the Two-Dimensional Toda Lattice 77
5.2 The Lattice Burgers Equation 85
5.3 Nonabelian Toda Lattice 86
5.4 Multisoliton Solutions of the Sine-Gordon Equation 88
5.5 The Nonlinear Network Equations and Related Systems 92
5.6 The Lattice Silin-Tikhonchuk Equation 94

6. Darboux Transformation for 2 + 1 Nonlinear Evolution Equations and Localized Soliton Solutions 97
6.1 The Davey-Stewartson Equation 97
6.2 The Veselov-Novikov Equation 102

7. Hamiltonian Interpretation of the Darboux Transformations and Other Problems 104
7.1 Darboux Transformation as a Canonical Transformation 104
7.2 The Relationship Between the Zakharov-Shabat Dressing Method and Darboux Transformations 105
7.3 Phase Shifts in Soliton Interaction 106

Comments on the Literature 108
Summary and Outlook 112
