

Contents

Foreword.....	vii
Principal Lecturers	
T. BROOKE BENJAMIN	Lectures on nonlinear wave motion..... 3
D. J. BENNEY	Long waves..... 49
MARTIN D. KRUSKAL	The Korteweg–de Vries equation and related evolution equations..... 61
PETER D. LAX	Periodic solutions of the KdV equations.. 85
G. B. WHITHAM	Two-timing, variational principles and waves..... 97
Other Invited Lecturers	
MARK J. ABLOWITZ	Nonlinear dispersive waves and multi-phase modes..... 127
NORMAN BLEISTEIN	A brief introduction to ray methods for dispersive hyperbolic equations..... 133
E. FERMI, J. PASTA* AND S. ULAM	Studies on nonlinear problems. I..... 143
ALAN C. NEWELL	Envelope equations..... 157
HARVEY SEGUR	An alternative method to solve the Korteweg–de Vries equation?..... 165
Abstracts	
JERRY BONA AND DEB BOSE	Fixed point theorems for Fréchet spaces and the existence of solitary waves..... 175
JERRY BONA AND RONALD SMITH	Existence of solutions to the Korteweg–de Vries initial value problem..... 179

* Speaker

JAMES P. FINK AND WILLIAM S. HALL	Entrainment of frequency in evolution equations.....	181
JAMES P. FINK, WILLIAM S. HALL AND SIAMAK KHALILI	Perturbation expansions for some non-linear wave equations.....	183
A. D. GILBERT	An alternative derivation of Whitham's exact averaged variational principle.....	185
JOHN M. GREENE	WKB-KdV.....	189
G. M. HOMSY	Model equations for wavy viscous film flow.....	191
GRAY JENNINGS	Approximating nonlinear waves.....	195
R. S. JOHNSON	The Korteweg-de Vries equation with variable coefficients.....	197
JON C. LUKE	Landform evolution models.....	201
J. J. MAHONY	Cross waves.....	203
J. J. MAHONY	Validity of averaging methods for certain systems with periodic solutions.....	205
A. MENIKOFF	The existence of unbounded solutions of the Korteweg-de Vries equation.....	207
TAKAAKI NISHIDA AND JOEL A. SMOLLER	Solutions in the large for some nonlinear hyperbolic systems of conservation laws..	209
ALWYN C. SCOTT	The sine-Gordon equation.....	211
FREDERICK TAPPERT	Numerical solutions of the Korteweg-de Vries equation and its generalizations by the split-step Fourier method.....	215
LLOYD R. WALKER	Interfacial solitary waves in a two-fluid medium.....	217
	Bibliography of recent publications.....	219
Indexes		
	Author addresses.....	225
	Referenced authors.....	227
