<b>Preface</b> . . . . .	7
 <b>Part I: An Analysis of the Finite Element Method for Second Order Elliptic Boundary Value Problems</b> by A. H. Schatz	
0. Introduction . . . . .	9
1. Some function spaces, notation and preliminaries . . . . .	11
2. Some finite element spaces and their properties . . . . .	21
3. Orthogonal projections onto finite element spaces in $L_2$ , in $H^1$ and $H_0^1$ . . . . .	39
4. Galerkin finite element method for second order elliptic boundary value problems. Basic $H^1$ and $L_2$ estimates . . . . .	51
5. Indefinite second order elliptic problems . . . . .	67
6. Local error estimates . . . . .	73
7. An introduction to grid refinement. An application to boundary value problems with non-convex corners . . . . .	85
8. Maximum norm estimates for the $L_2$ projection. A method using weighted norms . . . . .	99
9. Maximum norm estimates for the Galerkin finite element method for second order elliptic problems . . . . .	109
References . . . . .	126
 <b>Part II: The Finite Element Method for Parabolic Problems</b> by Vidar Thomée	
1. Introduction . . . . .	135
2. Non-smooth data error estimates for the semidiscrete problem . . . . .	161
3. Completely discrete schemes . . . . .	173
4. A nonlinear problem . . . . .	191
References . . . . .	212
 <b>Part III: Boundary Element Methods for Elliptic Problems</b> by W. L. Wendland	
<b>1 Boundary Integral Equations</b>	
1.1 The exterior Neumann problem for the Laplacian . . . . .	223
1.2 Exterior viscous flow problems . . . . .	230
1.3 Scattering problems in acoustics . . . . .	232
1.4 Some problems of elastostatics . . . . .	234
1.5 The boundary integral equations of the direct approach for general elliptic boundary value problems of even order . . . . .	237

<b>2</b>	<b>The Characterization of Boundary Integral Operators and Galerkin Boundary Element Methods</b>	
2.1	The representation and the order of boundary integral operators . . .	239
2.2	Variational formulation and strong ellipticity . . . . .	244
2.3	Boundary element Galerkin methods . . . . .	247
<b>3</b>	<b>Collocation Methods</b>	
3.1	Collocation with smoothest splines of piecewise odd polynomials . . .	257
3.2	Naive spline collocation for $n = 2$ on almost uniform partitions . . . .	264
<b>4</b>	<b>Concluding Remarks</b> . . . . .	267
	<b>Bibliography</b> . . . . .	269
