

CONTENTS

I.	Introduction	1
II.	Rearrangements	7
	1. A catalogue of rearrangements	7
	2. Common properties of rearrangements	20
	3. Monotone decreasing and quasiconcave rearrangement	27
	4. Symmetric decreasing rearrangement	37
	5. Monotone decreasing rearrangement in direction y	45
	6. Starshaped rearrangement	62
	7. Steiner symmetrization with respect to $\{y = 0\}$	82
	8. Schwarz symmetrization	89
	9. Circular and spherical symmetrization	94
III.	Maximum principles	100
	10. The moving plane method	100
	11. Convexity of level sets	103
	12. Concavity or convexity of functions	112
	References	123
	Index of examples and assumptions	135
	Subject index	136
