

TABLE OF CONTENTS

EDITOR'S PREFACE	ix
PREFACE	xi
POSTSCRIPT	xiii
CHAPTER 1 / INTRODUCTION	1
1. Introduction	1
2. Propagation of a Plane Electromagnetic Wave in a Stratified Medium	2
3. Basic Differential Equations of the Electromagnetic Field	5
4. Propagation of E.M. Waves through Multilayers	8
5. The Schrödinger Equation	14
6. The Rectangular Potential Barrier	15
7. The JWKB Solutions	17
References	19
CHAPTER II / EIKONAL EQUATION AND THE WKB APPROXIMATION	21
1. Introduction	21
2. The Eikonal Expansion	21
3. Derivation of the Solution of the Schrödinger Equation using Matrix Methods	27
4. Asymptotic Behavior of the Solutions	34
References	37
CHAPTER III / INVARIANT IMBEDDING	38
1. Introduction	38
2. Invariant Imbedding Method	38
3. The Classical Approach	39
4. The Invariant Imbedding Approach for Particle Transport	40
5. Riccati Transformations	45
6. Linearization and Solution of the Riccati Equations	46
7. Conservation Relations	51
8. Scattering Matrix Formalism	54
9. Homogeneous Anisotropic Media Forming an Obstacle	56
References	58

CHAPTER IV / APPLICATION TO THE WAVE EQUATION	60
1. Introduction	60
2. A Continuous Medium Problem	62
3. Bremmer Solutions	66
4. Coupled Differential and Integral Equations for the Two Beams	70
5. Convergence Properties of the Series Solutions	73
6. Bremmer Series Using Finite Order Scattering Reflection and Transmission Functions	83
7. Wave Equations with a Source Term	90
References	93
CHAPTER V / THE BREMMER SERIES	95
1. Introduction	95
2. A New Type of Refractive Index Profile in Each Layer and the Reflection and Transmission Coefficients	95
3. Splitting of the Wave Function	103
4. Extensions to Other Types of Series	105
References	109
CHAPTER VI / GENERALIZATIONS	110
1. Introduction	110
2. Method of Successive Diagonalization	111
3. Approximation to the Eikonal Solution Using Quasilinearization	122
References	128
CHAPTER VII / TIME DEPENDENT PROCESSES	130
1. Introduction	130
2. Time Dependent Transport Problems	131
3. Transport Equation in the Limit of Large Velocities and Large σ	139
4. The Eigenvalue Problems	145
5. Eigenvalue Problems of Sturm-Liouville Systems	148
6. Time Dependent Wave Equation	151
7. Wiener Integrals	156
References	157

CHAPTER VIII / ASYMPTOTIC PROPERTIES	159
1. Introduction	159
2. Asymptotic Behavior of the Solutions of the Schrödinger Equation	160
3. The Phase Approach	169
4. Integral Equation Representation	180
References	189
CHAPTER IX / OPERATOR TECHNIQUES	191
1. Introduction	191
2. The Baker-Campbell-Hausdorff Series	192
3. The Magnus Expansion	198
4. Higher Dimensional Wave Equations	202
5. Multidimensional Imbedding	205
6. Higher Order Equations	207
References	213
CHAPTER X / VARIATIONAL PRINCIPLES	215
1. Introduction	215
2. Bubnov-Galerkin Method	215
3. The Rayleigh-Ritz Method	220
4. Sturm-Liouville Theory	230
5. Rayleigh-Ritz Method and Physical Processes	235
6. The Maximum Functional	243
7. Dynamic Programming Method	247
References	256
CHAPTER XI / DYNAMIC PROGRAMMING AND SOLUTION OF WAVE EQUATIONS	259
1. Introduction	259
2. Properties of the Green's Function	259
3. The Sturm Oscillation Theorem and Unimodal Properties	265
4. Characteristic Values and Characteristic Functions	265
5. Determination of Characteristic Values of the Sturm-Liouville Equation	276
6. Another Type of Cauchy System for the Green's Function and the Solution of Two Point Boundary Value Problem	285
7. Fredholm Resolvent	288
8. The Riccati Equation	292
9. Quasilinearization	293
10. The Cross-Ratio Relations	302

11. Matrix Riccati Equation and Auxiliary Functions	304
References	308
CHAPTER XII / APPROXIMATIONS	310
1. Introduction	310
2. Quadrature	310
3. Differential Quadrature	312
4. Determination of Weighting Coefficients	314
5. Higher Order Problems	315
6. Spline Approximation	317
7. Approximate Solutions	321
8. Segmental Curve Fitting	325
9. Dynamic Programming Approach	326
10. Splines Via Dynamic Programming	327
11. Derivation of Spline by Dynamic Programming	327
12. Equivalence of the Recursion Relations Obtained by Dynamic Programming and the Usual Results	331
References	333
EXERCISES AND NOTES	335
INDEX OF NAMES	359
INDEX OF SUBJECTS	362
