TABLE OF CONTENTS

PART 1. REVIEW OF SOME ESSENTIALS IN WEAK SOLUTIONS AND DISTRIBUTIONS 1

CHAPTER 1. CLASSICAL VERSUS DISTRIBUTION SOLUTIONS 3

§1. Integral Versus Partial Differential Equations 3

§2. The Necessity of Generalized Solutions 6

§3. The Concept of Generalized Solution 12

§4. Why Use Distributions? 14

§5. Multiplication, Localization, Regularization, Convolution and Change of Variables 16

CHAPTER 2. IMPOSSIBILITY AND DEGENERACY RESULTS IN DISTRIBUTIONS 25

§1. Difficulties with Distribution Multiplication 25

§2. The Schwartz Impossibility Result 27

§3. Extensions 30

§4. Degeneracy Results 34

CHAPTER 3. LIMITATIONS OF THE LINEAR DISTRIBUTION THEORY 37

§1. The Lewy Inexistence Result 37

§2. Stability Paradoxes Concerning Weak Solutions of Nonlinear Partial Differential Equations . 39

PART 2. COLOMBEAU'S NONLINEAR THEORY OF GENERALIZED FUNCTIONS 49

CHAPTER 1. THE DIFFERENTIAL ALGEBRA $\mathcal{G}$ AS AN EXTENTION OF THE $\mathcal{D}'$ DISTRIBUTIONS 51

§1. Smooth Approximations and Representations .. 51

§2. Properties of the Differential Algebra $\mathcal{G}(R^n)$ 60

§3. Generalized Complex Numbers 68

§4. Point Values of Generalized Functions 73

§5. Integrals of Generalized Functions 78

§6. Coupled Calculus in $\mathcal{G}(R^n)$ 85

§7. Recapitulation 101

§8. General Nonlinear Operations on $\mathcal{G}(R^n)$..... 104

§9. Generalized Functions on Arbitrary Domains .. 105

§10. Variants of Colombeau's Differential Algebras $\mathcal{G}$ 108

§11. Changes of Variables in Generalized Functions 112

Appendix 1. The Natural Character of Colombeau's Differential Algebra 115

Appendix 2. Asymptotics Without a Topology 124

Appendix 3. Properties of the Index Set Φ 127

Appendix 4. The Sheaf Structure of Generalized Functions 131

Appendix 5. Connections With Previous Attempts in Distribution Multiplication 134

Appendix 6. An Intuitive Illustration of the Structure of Colombeau's Algebra $\mathcal{G}$ .. 138

CHAPTER 2. GENERALIZED SOLUTIONS OF NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS 145

§1. Preliminary Remarks 145

§2. Shock Wave Equations and Solutions 147

§3. Generalized Solutions of Nonlinear Wave Equations in Quantum Field Interaction 151

§4. Restrictions of Generalized Functions to Subspaces 161

§5. Generalized Solutions of Nonlinear Parabolic Equations 164

§6. Generalized Functions on Arbitrary Subsets 165

CHAPTER 3. GENERALIZED SOLUTIONS FOR LINEAR PARTIAL DIFFERENTIAL EQUATIONS 169

§1. Preliminary Remarks 169

§2. Smooth Partial Derivatives 171

§3. Solutions for Distributionally Unsolvable Equations 177

§4. Linear Scattering 183

PART 3. A NECESSARY STRUCTURE FOR NONLINEAR THEORIES OF GENERALIZED FUNCTIONS 193

CHAPTER 1. STABILITY, GENERALITY AND EXACTNESS OF GENERALIZED SOLUTIONS 195

§1. Preliminary Remarks 195

§2. Some Basics of the Customary Sequential Approach in Solving Nonlinear Partial Differential Equations 204

§3. A Natural Framework for Generalized Solutions of Nonlinear Partial Differential Equations . 212

§4. The Neutrix Condition 214

§5. Extending Nonlinear Partial Differential Operators to Generalized Functions 216

§6. Notions of Generalized Solution 221

§7. Stability, Generality and Exactness 224

§8. Solution to Stability Paradoxes 229

§9. General Nonlinear Partial Differential Equations 231

§10. Sequential Solvability of Polynomial Nonlinear Partial Differential Equations 233

§11. Resolution of Nowhere Dense Singularities of Generalized Solutions 247

§12. Application 1: Coherence for Linear Elliptic and Hypoelliptic Equations 257

§13. Application 2: Global Version of the Cauchy-Kovalevskaia Theorem 259

Appendix 1. Neutrix Calculus and Negligible Sequences of Functions 267

Appendix 2. The Cauchy-Bolzano Quotient Algebra Construction of the Real Numbers 271

Appendix 3. Details on Stability Paradoxes and Existence and Uniqueness of Solutions for Nonlinear Partial Differential Equations 275

Appendix 4. The Deficiency of the Distribution Theory Concerning Exactness 280

Appendix 5. Systems of Nonlinear Partial Differential Equations 284

CHAPTER 2. CHAINS OF ALGEBRAS OF GENERALIZED FUNCTIONS 287

§1. Restrictions on Embeddings of the Distributions into Quotient Algebras 287

§2. Regularizations 292

§3. The Particular Case of Colombeau's Algebra $\mathcal{G}(R^n)$ 300

§4. Neutrix Characterization of Regular Ideals .. 306

§5. The Utility of Chains of Algebras of Generalized Functions 316

§6. Nonlinear Partial Differential Operators in Chains of Algebras 337

§7. Limitations on the Embedding of Smooth Functions into Chains of Algebras 338

CHAPTER 3. RESOLUTION OF SINGULARITIES OF WEAK SOLUTIONS FOR POLYNOMIAL NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS 349

§1. Introduction 349

§2. Simple Polynomial Nonlinear Partial Differential Equations and Resolution of Singularities 351

§3. Resolution of Singularities of Nonlinear Shock Waves 361

§4. Resolution of Singularities of Klein-Gordon Type Nonlinear Waves 362

§5. Junction Conditions and Resolution of Singularities of Weak Solutions for the Equations of Magnetohydrodynamics and General Relativity . 364

§6. Resoluble Systems of Polynomial Nonlinear Partial Differential Equations 377

§7. Computation of the Junction Conditions 380

§8. Examples of Resoluble Systems of Polynomial Nonlinear Partial Differential Equations 382

§9. Global Version of the Cauchy-Kovalevskaia Theorem in Chains of Algebras of Generalized Functions 384

FINAL REMARKS 391
