

## Table of Contents

Series Editor's Preface	vii
Preface	xiii
Acknowledgement	xiv
Introduction	1
CHAPTER I. Scattering by an Obstacle	14
1. Statement of the Problem. Basic Integral Equations	14
2. Existence and Uniqueness of the Solution to the Scattering Problem	25
3. Eigenfunction Expansion Theorem	44
4. Properties of the Scattering Amplitude	52
5. The $S$ -Matrix and Wave Operators	62
6. Inequalities for Solutions to Helmholtz's Equation for Large frequencies	65
7. Representations of solutions to Helmholtz's Equation	71
CHAPTER II. The Inverse Scattering (Diffraction) Problem	84
1. Statement of the Problem and Uniqueness Theorems	84
2. Reconstruction of Obstacles from the Scattering Data at High Frequencies	94
3. Stability of the Surface with Respect to Small Perturbations of the Data	104
CHAPTER III. Time Dependent Problem	108
1. Statement of the Problems	108
2. The Limiting Amplitude Principle (Abstract Results)	112
3. The Limiting Amplitude Principle for the Laplacian in Exterior Domains	130
4. Decay of Energy	136
5. Singularity and Eigenmode Expansion Methods	139
CHAPTER IV. $T$ -Matrix Scheme and Other Numerical Schemes	144
1. Statement of the Problem	144
2. Justification of the $T$ -Matrix Scheme	148
3. Numerical Results	173
4. Other Schemes	178

CHAPTER V. Scattering by Small Bodies	181
1. Scattering by a Single Small Body	181
2. Scattering by Many Small Bodies	188
3. Electromagnetic Wave Scattering by Small Bodies	193
4. Behavior of the Solutions to Exterior Boundary Value Problems at Low Frequencies	197
CHAPTER VI. Some Inverse Scattering Problems of Geophysics	217
1. Inverse Scattering for Geophysical Problems	217
2. Two Parameter Inversion	247
3. An Inversion Formula in Scattering Theory	259
4. A Model Inverse Problem of Induction Logging	274
CHAPTER VII. Scattering by Obstacles with Infinite Boundaries	285
1. Statement of the Problem	285
2. Spectral Properties of the Laplacians	286
3. Spectral Properties of the Dirichlet Laplacian in Semi-Infinite Tubes	293
4. Absence of Positive Eigenvalues for the Dirichlet Laplacian Under Local Assumptions at Infinity	296
5. The Limiting Absorption Principle and Compact Perturbations of the Boundary	309
6. Eigenfunction Expansions in Canonical Domains	317
APPENDIX 1. Summary of some Results in Potential Theory and Embedding Theorems	319
APPENDIX 2. Summary of some Results in Operator Theory	329
APPENDIX 3. Eigenfunction Expansion and Asymptotics of the $s$ -Values for some Nonselfadjoint Operators	334
APPENDIX 4. Stable Numerical Differentiation	344
APPENDIX 5. Limit of the Spectra of the Interior Neumann Problems when a Solid Domain Shrinks to a Plane One	351

APPENDIX 6. Construction of a Surface from its Principal Curvatures	358
APPENDIX 7. Resonances	365
Research Problems	394
Bibliographical Notes	396
Bibliography	407
List of Symbols	420
Index	422
