

# CONTENTS

<b>1. Linear Differential Equations</b>	<b>1</b>
1.1 Linear Operators, 1	
1.2 Ordinary Differential Equations, 2	
1.3 Homogeneous Linear ODE with Constant Coefficients, 5	
1.4 Euler's ODE, 7	
1.5 Linear PDEs, 9	
1.6 Classification of a Linear PDE of Second Order, 9	
1.7 Boundary Value Problems with PDEs, 10	
1.8 Second Order Linear PDEs with Constant Coefficients, 12	
1.9 Separation of Variables, 21	
<b>2. Orthogonal Sets of Functions</b>	<b>26</b>
2.1 Orthogonality and Vectors, 26	
2.2 Orthogonal Functions, 28	
2.3 Complex Functions, 32	
2.4 Additional Concepts of Orthogonality, 33	
2.5 The Sturm-Liouville Boundary Value Problem, 35	
2.6 Uniform Convergence of Series, 44	
2.7 Series of Orthogonal Functions, 47	
2.8 Approximation by Least Squares, 49	
2.9 Completeness of Sets, 51	
<b>3. Fourier Series</b>	<b>54</b>
3.1 Piecewise Continuous Functions, 54	
3.2 A Basic Fourier Series, 59	
3.3 Even and Odd Functions, 63	
3.4 Fourier Sine and Cosine Series, 63	
3.5 Complex Fourier Series, 66	
3.6 Uniform Convergence of Fourier Series, 72	
3.7 Differentiation of Fourier Series, 76	
3.8 Integration of Fourier Series, 78	
3.9 Double Fourier Series, 80	
3.10 Finite Fourier Transforms, 83	

<b>4. Fourier Integrals</b>	<b>88</b>
4.1 Uniform Convergence of Integrals, 88	
4.2 A Generalization of the Fourier Series, 93	
4.3 Fourier Sine and Cosine Integrals, 96	
4.4 The Exponential Fourier Integral, 98	
4.5 Fourier Transforms, 103	
<b>5. Mathematical Models and Boundary Value Problems</b>	<b>109</b>
5.1 The Vibrating String, 109	
5.2 Verification and Uniqueness of the Solution of the Vibrating String Problem, 116	
5.3 The Vibrating String with Two Nonhomogeneous Conditions, 119	
5.4 Longitudinal Vibrations Along an Elastic Rod, 121	
5.5 Heat Conduction, 127	
5.6 Verification and Uniqueness of the Solution for the Heat Problem, 132	
5.7 Gravitational Potential, 135	
5.8 Laplace's Equation, 136	
<b>6. Continuation of Models and Boundary Value Problems</b>	<b>143</b>
6.1 The Vibrating Membrane, 143	
6.2 The Vibrating String with an External Force, 150	
6.3 Nonhomogeneous End Temperatures in a Rod, 153	
6.4 A Rod with Insulated Ends, 156	
6.5 A Semi-Infinite Bar, 162	
6.6 An Infinite Bar, 164	
6.7 A Semi-Infinite String, 169	
6.8 A Semi-Infinite String with Initial Velocity, 172	
<b>7. Bessel Functions and Boundary Value Problems</b>	<b>179</b>
7.1 Bessel's Equation, 179	
7.2 The Gamma Function and the Bessel Function, 181	
7.3 Additional Bessel Functions, 184	
7.4 Differential Equations Solvable with Bessel Functions, 187	
7.5 Special Bessel Functions and Identities, 188	
7.6 An Integral Form for $J_n(x)$ , 193	
7.7 Singular SLPs, 196	
7.8 Orthogonality of Bessel Functions, 197	
7.9 Orthogonal Series of Bessel Functions, 200	
7.10 Bessel Functions and Cylindrical Geometry, 203	

- 7.11 Temperature in a Circular Disk with Insulated Faces, 204
- 7.12 Vibrations of a Circular Membrane Dependent on Distance from Center, 207
- 7.13 Steady State Temperature in a Right Semicircular Cylinder, 209
- 7.14 Harmonic Interior of a Right Circular Cylinder, 213

**8. Legendre Polynomials and Boundary Value Problems** **218**

- 8.1 Legendre's Differential Equation, 218
- 8.2 Rodrigues' Formula for Legendre Polynomials, 223
- 8.3 A Generating Function for  $P_n(x)$ , 226
- 8.4 The Legendre Polynomial  $P_n(\cos \theta)$ , 228
- 8.5 Orthogonality and Norms of  $P_n(x)$ , 229
- 8.6 Legendre Series, 231
- 8.7 Legendre Polynomials and Spherical Geometry, 235
- 8.8 Steady State Temperature Distribution in a Sphere, 238
- 8.9 Potential for a Sphere, 240
- 8.10 The Generalized Legendre Equation, 243

**References and Additional Reading** **249**

**Answers to Exercises** **251**

**Index** **267**
