## ORDINARY DIFFERENTIAL EQUATIONS

<i>Chapter 1.</i>	1.0. Introduction	3
	1.1. Existence and Continuation of Solutions	3
	1.2. Scalar Differential Inequalities	7
	1.3. Maximal and Minimal Solutions	11
	1.4. Comparison Theorems	15
	1.5. Finite Systems of Differential Inequalities	21
	1.6. Minimax Solutions	25
	1.7. Further Comparison Theorems	27
	1.8. Infinite Systems of Differential Inequalities	31
	1.9. Integral Inequalities Reducible to Differential Inequalities	37
	1.10. Differential Inequalities in the Sense of Caratheodory	41
	1.11. Notes	44
<i>Chapter 2.</i>	2.0. Introduction	45
	2.1. Global Existence	45
	2.2. Uniqueness	48
	2.3. Convergence of Successive Approximations	60
	2.4. Chaplygin's Method	64
	2.5. Dependence on Initial Conditions and Parameters	69
	2.6. Variation of Constants	76
	2.7. Upper and Lower Bounds	79
	2.8. Componentwise Bounds	84
	2.9. Asymptotic Equilibrium	88
	2.10. Asymptotic Equivalence	91
	2.11. A Topological Principle	96
	2.12. Applications of Topological Principle	100
	2.13. Stability Criteria	102
	2.14. Asymptotic Behavior	108
	2.15. Periodic and Almost Periodic Systems	120
	2.16. Notes	129

<i>Chapter 3.</i>	3.0. Introduction	131
	3.1. Basic Comparison Theorems	131
	3.2. Definitions	135
	3.3. Stability	138
	3.4. Asymptotic Stability	145
	3.5. Stability of Perturbed Systems	155
	3.6. Converse Theorems	158
	3.7. Stability by the First Approximation	177
	3.8. Total Stability	186
	3.9. Integral Stability	191
	3.10. $L^p$ -Stability	199
	3.11. Partial Stability	205
	3.12. Stability of Differential Inequalities	209
	3.13. Boundedness and Lagrange Stability	212
	3.14. Eventual Stability	222
	3.15. Asymptotic Behavior	229
	3.16. Relative Stability	241
	3.17. Stability with Respect to a Manifold	244
	3.18. Almost Periodic Systems	245
	3.19. Uniqueness and Estimates	254
	3.20. Continuous Dependence and the Method of Averaging	257
	3.21. Notes	264
<i>Chapter 4.</i>	4.0. Introduction	267
	4.1. Main Comparison Theorem	267
	4.2. Asymptotic Stability	269
	4.3. Instability	273
	4.4. Conditional Stability and Boundedness	277
	4.5. Converse Theorems	284
	4.6. Stability in Tube-like Domain	293
	4.7. Stability of Asymptotically Self-Invariant Sets	297
	4.8. Stability of Conditionally Invariant Sets	305
	4.9. Existence and Stability of Stationary Points	308
	4.10. Notes	311

## VOLTERRA INTEGRAL EQUATIONS

<i>Chapter 5.</i>	5.0. Introduction	315
	5.1. Integral Inequalities	315
	5.2. Local and Global Existence	319
	5.3. Comparison Theorems	322
	5.4. Approximate Solutions, Bounds, and Uniqueness	324
	5.5. Asymptotic Behavior	327
	5.6. Perturbed Integral Equations	333
	5.7. Admissibility and Asymptotic Behavior	340
	5.8. Integro-differential Inequalities	350
	5.9. Notes	354

<i>Bibliography</i>	355
AUTHOR INDEX	385
SUBJECT INDEX	388
