

CONTENTS

INTRODUCTION	IV
CHAPTER 1 - Some Problems of Integral Geometry	1
1. Problem of Determining a Function from Integrals over Ellipsoids of Revolution	2
2. Generalization to Analytic Curves	10
3. Problem of Determining a Function inside a Circle from Integrals along a Family of Curves Invariant to Rotation about the Center of the Circle	13
4. On the Problem of Determining a Function from Its Mean Values over Circles	19
CHAPTER 2 - Linearized Inverse Dynamic Problem for the Telegraph Equation	22
1. Statement of the Inverse Problem and Its Linearization ..	22
2. Linearized One-Dimensional Inverse Problem in Two- Dimensional Space	24
3. Two Formulations of the Linearized Inverse Problem in Three-Dimensional Space	28
4. Derivation of a Nonlinear Differential Equation for the Inverse Problem	31
CHAPTER 3 - Linearized Inverse Kinematic Problem for the Wave Equation	33
1. Formulation of the Problem and Its Linearization	33
2. An Application of the Linearized Version of the Inverse Kinematic Problem to Geophysics	36
CHAPTER 4 - Inverse Heat Conduction Problems with Continuously Active Sources	39
1. Inverse Heat Conduction Problems for a Half-Plane	39
2. n-Dimensional Inverse Heat Conduction Problems	45
3. Application of the Problems to Geophysics	49
CHAPTER 5 - Inverse Problems for Second-Order Elliptic Equations	51
1. Inverse Problem for Equation (1) in a Half-Plane	52
2. Inverse Problem for Equation (1) in a Half-Space	54
BIBLIOGRAPHY	57
